

eTable 1. Methods of studies on mobile phone use and tumor risk.

Reference	Geog. Location	Period of case ascertain.	Age Range	Hospital or population based	Tumors considered & whether histol; grade; lobe covered	Reported response rate		% proxy interviews	% exposed among controls	Comments
						Cases	Controls			
<u>US Studies</u>										
Dreyer et al. 1999 ¹⁵	USA	1994	20+	Population	Total mortality					Cohort based on operator data. Follow up to Rothman 1996. Subjects using handheld phones compared to subjects using bag phones.
Muscat et al. 2000 ¹³ Muscat et al. 2002 ¹⁶	USA	1994-1998	18-80	Hospital	Malignant brain tumours (ICD9-CM codes 191.0-191.9) Lobe Grade Acoustic neuroma	75%	90%	9% brain tumor cases 1.1% AN cases 1.4% controls	18% brain tumor controls 27% AN controls (ever had a mobile phone subscription)	Data collection through personal interviews.
Inskip et al. 2001 ⁷	USA	1994-1998	18+	Hospital	Glioma, Meningioma, Acoustic neuroma Grade Lobe (ICD & morphology codes in paper)	92%	86%	16% glioma 8% meningioma 3% AN 3% controls	22% (regular use, i.e. at least twice per week) 45% (ever use)	Data collection through personal interviews.
Warren et al. 2003 ¹⁷	USA	1995-2000	Not stated	Hospital	Facial nerve Acoustic neuroma	Not stated	Not stated	0%	38% (ever use)	Data collection through telephone interviews.

<u>Hardell Studies</u>										
Hardell et al. 1999 ^{21,28}	Sweden	1994-1996	20-80	Population	All brain tumors Malign+Benign Acoustic neuroma Grade Lobe	90%	91%	Deaths excluded	38% (at least 8 hours of use)	Response proportions exclude deaths, physician refusals from denominator in all Hardell studies. Data collection through postal questionnaires.
Hardell et al. 2002 ^{20,27}	Sweden	1997-2000	20-80	Population	All brain tumors Malign+Benign Acoustic neuroma Grade Lobe	88%	91%	Deaths excluded	Analogue 15% Digital 30% Cordless 27% (ever use)	Repeated interviews of selected subjects; Data collection through postal questionnaires.
Hardell et al. 2005 ¹⁸ Hardell et al. 2006 ¹⁹	Sweden	2000-2003	20-80	Population	Benign brain tumors Acoustic neuroma Meningioma Lobes Malignant brain tumors High grade astrocytomas	89% benign 88% malign	84%	Deaths excluded	Analogue 11% Digital 50% Cordless 44% Any type 66% (ever use)	Data collection through postal questionnaires.
Hardell et al. 2004 ²²	Sweden	1994-2000	21-80	Population	Salivary gland Also by localization and histopathology	91%	90%	Deaths excluded	Analogue 13% Digital 16% Cordless 19% Any type 33% (ever use)	Majority of controls from a 2002 brain tumor study Data collection through postal questionnaires.
Hardell et al. 2005 ²³	Sweden	1999-2002	18-74	Population	Non Hodgkin Lymphoma B-cell T-cell (further subdivided) Other	91%	92%	Deaths excluded	Analogue 18% Digital 55% Cordless 41% Any type 68% (ever use)	Controls recruited on “several occasions”, 30 cases excluded after ascertainment of exposure as NLH not confirmed Data collection through

										postal questionnaires.
Hardell et al. 2007 ²⁴	Sweden	1993-1997	20-75	Population	Testicular cancer Seminoma Non-seminoma	91%	89%	Deaths excluded	Analogue 20% Digital 16% Cordless 19% (ever use)	Data collection through postal questionnaires.
Hardell pooled analyses										
Hardell et al. 2006 ²⁶ Hardell et al. 2006 ²⁵	Sweden	1997-2003	20-80	Population	Benign brain tumors Acoustic neuroma Meningioma Malignant brain tumors High grade astrocytomas			Deaths excluded		Pooled analysis of Hardell 2002 ¹⁷ and 2005 ¹⁵ /2006 ¹⁶ No heterogeneity tests reported
Interphone studies										
Christensen et al. 2004 ³⁰ Christensen et al. 2005 ²⁹	Denmark	2000-2002	20-69	Population	Acoustic neuroma Meningioma Glioma Low grade, High grade (ICD & morphology codes in paper)	82% 71% 74%	64%	0% 2% 8%	46% 42% 50% (regular use=at least once per week during 6 months or more)	Proportion of regular use among controls reflects age and sex distribution of cases. Data collection through personal interviews.
Lonn et al. 2004 ⁸ Lonn et al. 2005 ¹²	Sweden	1999-2002 2000-2002	20-69	Population	Acoustic neuroma Meningioma Glioma Low grade, High grade Lobes (ICD & morphology codes in paper)	93% 84% 75%	72% 71%	0% 3% 9%	59% (regular use)	Data collection through personal interviews.

Schlehofer et al. 2007 ³³ Schuz et al. 2006 ³⁴	Germany	2001-2003	30-69	Population	Acoustic neuroma Meningioma Glioma Low grade, High grade	89% 88% 80%	55% in AN study 63% in brain tumor study	0% 1% 11%	38% 37% 39% (regular use)	Data collection through personal interviews.
Klaeboe et al. 2007 ³²	Norway	2001-2002	19-69	Population	Acoustic neuroma Meningioma Glioma	68% 71% 77%	69%	0% 0% 36%	63% (regular use)	Data collection through personal interviews. Large proportion of interviews was made over the phone.
Takebayashi et al. 2006 ⁹ Takebayashi et al. 2008 ³⁵	Japan	2000-2004	30-69	Hospital cases Population controls	Acoustic neuroma Meningioma Glioma Pituitary adenoma (ICD & morph- ology codes in paper)	84% 78% 59% 76%	52% 52% 53% 49%	0%	58% 52% 65% 65% (regular use)	Some hospitals did not participate. Controls selected through random digit dialing. Data collection through personal interviews.
Hepworth et al. 2006 ³¹	UK	2000-2004	18-69	Population	Glioma Low grade, High grade (ICD & morph- ology codes in paper)	51%	45%	7% cases	52% (regular use)	Study includes data from two centers in the UK. Data collection through personal interviews.
Hours et al. 2007 ³⁸	France	2001-2003	30-59	Hospital cases Population controls	Meningioma Glioma AN	60% 78% 81%	75%	4% cases	56% (regular use)	Some hospitals did not participate. Data collection through personal interviews.
Lonn et al. 2006 ³⁷	Denmark and Sweden	2000-2002	20-69	Population (malignant cases and all controls) Hospital	Malignant parotid gland Benign pleomorphic adenoma	85% (Malig n) 88% (Benig n)	60% (Denmar k) 72% (Sweden)	1 Malign case in Sweden	60% (regular use)	Matched controls in Denmark Results presented for two countries combined Data collection through

				cases (benign cases)						personal interviews.
Sadetzki et al. 2008 ³⁶	Israel	2001-2003	18-59	Population	Malignant and benign parotid gland histologically or cytologically confirmed	84% (Malig n) 87% (Benig n)	66%	4% cases 0.1 % controls	55% (regular use)	Data collection through personal interviews.
Interphone pooled analyses										
Schoemaker et al. 2005 ⁴¹	Denmark Finland Norway Sweden UK-South UK-North	1999-2004	18-69	Population	Acoustic neuroma	83% (69-91)	51% (42-69)	0%	54% (regular use)	Age range varied by country. Pooled analysis of six Interphone studies, includes Christensen 2004 ²⁷ , Lonn 2004 ⁸ , Klaeboe 2007 ²⁹ , and data from Finland and the UK not previously published
Lahkola et al. 2007 ³⁹ Lahkola et al. 2008 ⁴⁰	Denmark Finland Norway Sweden UK-South	2000-2004	18-69	Population	Meningioma Glioma Glioblastoma (ICD & morphology codes in paper)	60% (37-81) glioma 74% (55-90) meningioma	50% (42-69)	12% of glioma cases 1.6% of meningioma 0.1% of controls	59% (regular use) 92% (ever use)	Pooled analysis of five Interphone studies, includes Christensen 2005 ²⁶ , Lonn 2005 ¹² and Klaeboe 2007 ²⁹ , part of Hepworth 2006 ²⁸ , and data from Finland not previously published
<u>Subscriber list based studies and Other Studies</u>										
Auvinen et al. 2002 ¹¹	Finland	1996	20-69	Population	All BT Glioma,				11% (ever had a	Exposure assessment based on operator data

					Meningioma, Salivary gland Microscop Lobe				mobile phone subscription)	in case-control design
Schuz et al. 2006 ⁴³ Johansen et al. 2001 ⁴²	Denmark	1982-2002	18-	Population	All cancer Brain Meningioma Glioma Acoustic neuroma Salivary gland Eye, leukemia, testis Lobes				Cohort study	Exposed cohort: mobile phone subscribers. Compared to sex-, age-, and calendar year specific cancer incidence in the general Danish population. Originally published by Johansen 2001, longer follow-up analysed in Schuz 2006.
Stang et al. 2001 ⁴⁴	Germany	1995-1998	35-74	Part- hospital Part-pop.	Uveal melanoma	84% pop. 88% hosp.	48% pop. 79% hosp.	0%	<10%
