Longitudinal Milestone Assessment Extending Through Subspecialty Training: The Relationship Between ACGME Internal Medicine Residency Milestones and Subsequent Pulmonary and Critical Care Fellowship Milestones. Acad Med.

## **Supplemental Digital Appendix 5**

## Association (OR) of IM Milestones with Milestone Level 2.5 During the First Year of PCCM Using Logistic Regression, From a Multi-Center Retrospective Study of Milestone Assessment During Residency and Subspecialty Training, 2017–2018

	Subcompetency Description	Fellows Rated ≤ 2.0 During the IM Residency (%, n)	Association (OR) with Milestone Rating ≤ 2.0 During Any Point of IM Training (95% CI)	P-value
PROF01	Has professional and respectful interactions with patients, caregivers, and members of the interprofessional team	11.6% (n=41)	1.58 [0.63,3.98]	0.184
PROF02	Accepts responsibility and follows through on tasks	16.9% (n=60)	1.50 [0.69,3.26]	0.165
PROF03	Responds to each patient's unique characteristics and needs	16.9% (n=60)	1.72 [0.80,3.73]	0.058
PROF04	Exhibits integrity and ethical behavior in professional conduct	12.7% (n=45)	0.99 [0.39,2.49]	0.970
ICS01	Communicates effectively with patients and caregivers	14.4% (n=51)	2.84 [1.24,6.49]	0.001 <sup>a</sup>
ICS02	Communicates effectively in interprofessional teams	13.6% (n=48)	1.41 [0.60,3.34]	0.281
ICS03	Appropriate utilization and completion of health records	12.7% (n=45)	1.15 [0.47,2.78]	0.679

This table displays the association between IM milestone rating of  $\leq 2.0$  (at any time point during residency, dichotomized variable) with a PCCM fellowship milestone rating of  $\leq 2.0$  during the first year of PCCM training (dichotomized outcome) using a simple logistic regression. <sup>a</sup>Statistical significant associations as determined by a Bonferonni correction (p-value 0.007.
