

Supplemental Digital Content 3; Supplemental Figure 3.

Supplemental Figure 3. Scatterplots showing the relationship between weight and the post hoc etas (from NONMEM parlance) for the base model (3A) and the final model (3B); and scatterplots showing the relationship between age and the post hoc etas for the base model (3C) and the final model (3D). Data are shown as black dots. Locally weighted scatterplot smoothing (LOWESS) lines are in red.
