**Supplemental Figure 2:** Spearman correlation and Bland-Altman analysis

Supplemental Figure 2: Left: Spearman correlation between Bellani's method (used in the present study) and Yoshida's method. Applying both methods to our data showed they were positively associated (*r*=0.68, p=0.001). Right: Bland–Altman analysis showed a bias of -0.17 (95%CI agreement: -1.8 to 1.4).
