

Global Obesity and the Effect on Women's Health

Nancy C. Chescheir, MD

Obstet Gynecol 2011;117(5)

ACCME Accreditation

The American College of Obstetricians and Gynecologists (ACOG) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. (*Continuing medical education credit for "Global Obesity and the Effect on Women's Health" will be available through May 2014.*)

AMA PRA Category 1 Credit™ and ACOG Cognate Credit

The American College of Obstetricians and Gynecologists (ACOG) designates this educational activity for a maximum of 2 AMA PRA Category 1 Credits™ or up to a maximum of 2 Category 1 ACOG cognate credits. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Disclosure Statement

Current guidelines state that continuing medical education (CME) providers must ensure that CME activities are free from the control of any commercial interest. All authors, reviewers, and contributors have disclosed to ACOG all relevant financial relationships with any commercial interests. The authors, reviewers, and contributors declare that neither they nor any business associate nor any member of their immediate families has financial interest in, or other relationships with any manufacturer of products or any providers of services discussed in this program. All conflicts have been resolved through group and outside review of all content.

Before submitting this form, please print a completed copy as confirmation of your program participation.

ACOG Fellows: To obtain credits, complete and return this form by clicking on "Submit" at the bottom of the page. Credit will be automatically recorded upon receipt and online transcripts will be updated twice monthly. ACOG Fellows may check their transcripts online at <http://www.acog.org>.

Non-ACOG Fellows: To obtain credits, print the printout of the completed quiz to your accrediting institution. The printout of the completed quiz is documentation for your continuing medical education credits.

1. The single leading global cause of health loss is:

- A. Parasites
- B. Cancer
- C. Obesity
- D. Smoking
- E. Undernutrition

2. Based on the 2008 Behavioral Risk Factor Surveillance System (BRFSS) survey of obesity, how many states had obesity rates (body mass index [BMI] greater than 30 mg/kg²) of 25% or greater?

- A. 19
- B. 25
- C. 31
- D. 37
- E. 43

3. Obesity costs as a percentage of health care costs are greatest in:

- A. The United States
- B. Canada
- C. Australia
- D. Netherlands
- E. France

4. When compared to normal-weight women, obese women who consider breastfeeding are more likely to:

- A. Initiate breastfeeding
- B. Have obese children
- C. Breastfeed for a greater duration
- D. Have delayed lactogenesis

5. The greatest increase in the rate of diabetes worldwide is expected to occur in:

- A. Chile
- B. Egypt
- C. Sub-Saharan Africa
- D. India
- E. China

6. Between 2007 and 2017, it is estimated that stroke, diabetes, and heart disease will reduce national income in China by:
- A. \$33 billion
 - B. \$142 billion
 - C. \$237 billion
 - D. \$558 billion
 - E. \$727 billion
7. The most likely health consequence of a country moving from “least developed” to “less developed” economic status is:
- A. Increased fertility rate
 - B. Increased rates of death from noncommunicable disease
 - C. Decreased rates of trauma deaths
 - D. Increased rates of death from communicable disease
 - E. Decreased rates of cardiovascular disease
8. In Pakistan, which of the following is the strongest predictor of overweight and obese BMI?
- A. Low socioeconomic status
 - B. Urban living
 - C. Vegetarian diet
 - D. Low educational achievement
 - E. Availability of train travel
9. Which of the following conditions shows only a slight improvement with weight loss?
- A. Stroke
 - B. Hypertension
 - C. Type 2 diabetes mellitus
 - D. Osteoarthritis
 - E. Sleep apnea

10. Which of the following will show the greatest benefit from increased physical activity?

- A. Osteoarthritis
- B. Breast cancer
- C. Coronary artery disease
- D. Gallbladder disease
- E. Sleep apnea
