Appendix 3. Distribution of Stroke Type by Hypertensive Disorders of Pregnancy Status and Pregnancy Period: Pregnancy Hospitalizations, Nationwide Inpatient Sample, 1994 to 2011

	Overall (N = 31,616) n (%)			Hospitalizations With HDP- Associated Stroke (n = 9,877) n (%)			Hospitalizations With Non-HDP- Associated Stroke $(n=21,740)$ $n~(\%)$		
By Stroke Subtype	Antenatal	Delivery	Postpartum	Antenatal	Delivery	Postpartum	Antenatal	Delivery	Postpartum
Hemorrhagic Stroke	2,428 (24.0)	2,093 (19.4)	4,255 (39.4)	307 (21.2)	1,188 (28.0)	1,911 (45.6)	2,121 (24.5)	905 (13.9)	2,344 (35.5)
Ischemic Stroke*	5,554 (55.0)	3,062 (28.5)	3,309 (30.6)	839 (57.8)	1,394 (32.8)	1,178 (28.1)	4,715 (54.5)	1,668 (25.6)	2,131 (32.2)
Unspecified	2,106 (21.0)	5,594 (52.0)	3,217 (30.0)	300 (21.0)	1,667 (39.2)	1,093 (26.3)	1,806 (21.0)	3,927 (60.5)	2,123 (32.3)
Combined Stroke	10,086	10,748	10,781	1,446	4,249	4,182 (42.3)	8,642	6,500	6,598 (30.4)
