**Appendix 3. Baseline Characteristics of Study Subjects Stratified by Age (n =310,668)**

Characteristics	mean age (year)	SD	number of study subjects (%)
<b>Purpose for app usage</b>			
contraception	30.89	8.5	166,221 (53.5)
pregnancy hope	32.41	5.9	118,852 (38.3)
others	30.19	7.1	25,595 (8.24)
<b>Number of children</b>			
0	29.25	5.4	24,007 (7.73)
1	32.01	5.7	1388 (0.45)
2	35.91	6.6	410 (0.13)
3	37.66	6.8	119 (0.038)
4	38.46	4.4	17 (0.0055)
unknown	31.62	7.7	284,727 (91.6)
<b>Marital status</b>			
unmarried	25.49	6.4	1684 (0.54)
married	30.77	5.4	6147 (1.98)
divorce or bereavement	35.91	6.7	240 (0.077)
others	31.48	7.6	302,597 (97.4)

Partner status			
absent	27.73	7.8	505 (0.16)
present	29.88	6.1	7873 (2.53)
others	31.49	7.6	302,290 (97.3)

Data are presented as mean (SD) for continuous variables and n (%) for dichotomous variables.

**Appendix 4. Box plots of body height (A) and weight (B), based on classification by menstrual cycle length. The box bounds the interquartile range divided by the median, and Tukey-style whiskers extend to a maximum of  $1.5 \times$  interquartile range beyond the box.**
