

1 Appendix II

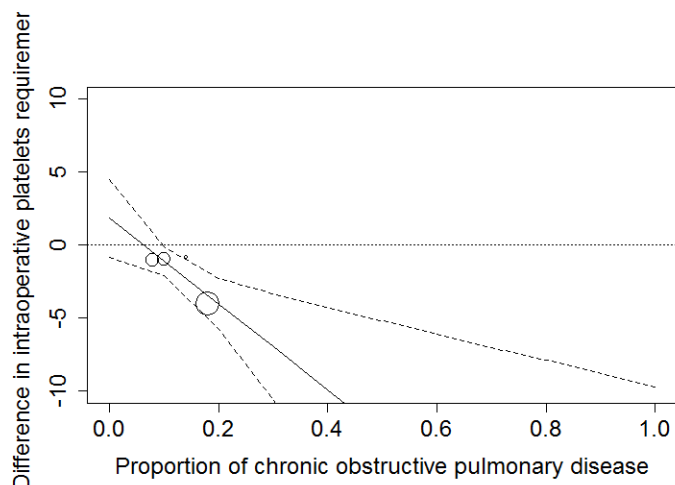

2 Figure 1. Bubble plot showing the mean difference in intraoperative fresh-frozen plasma requirement (units)
3 versus proportion of cystic fibrosis.

4
5 Figure 2. Bubble plot showing the mean difference in intraoperative fresh-frozen plasma requirement (units)
6 versus lung allocation score at transplant.

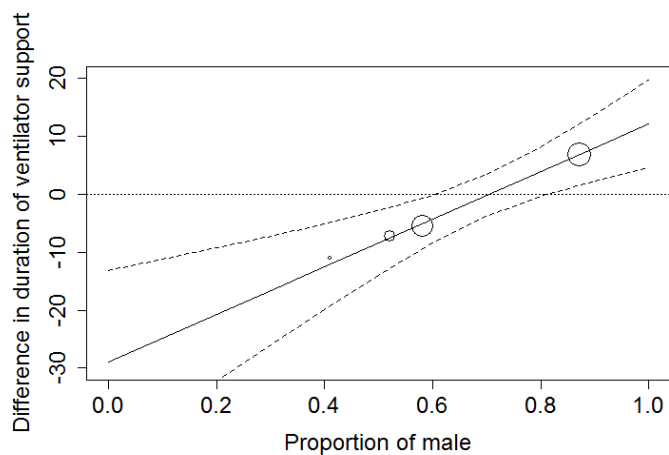

7
8 Figure 3. Bubble plot showing the mean difference in intraoperative platelets requirement (units) versus
9 proportion of chronic obstructive pulmonary disease.

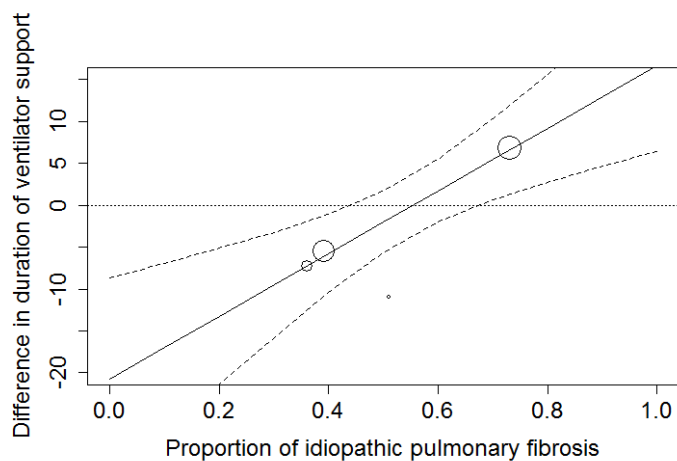

10

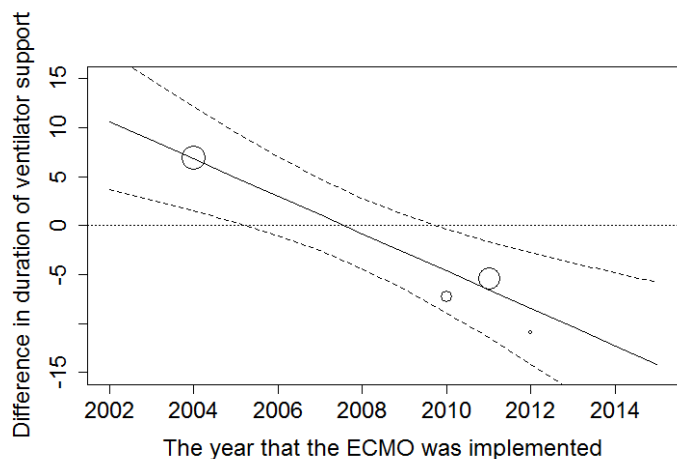

1 Figure 4. Bubble plot showing the mean difference in the duration of ventilator support (days) versus
 2 proportion of male.

3
 4
 5 Figure 5. Bubble plot showing the mean difference of the duration of ventilator support (days) versus
 6 proportion of idiopathic pulmonary fibrosis.

7
 8 Figure 6. Bubble plot showing the mean difference in the duration of ventilator support (days) versus the year
 9 that the ECMO was implemented in the study.
