

**Supplementary Figure 1.** The heat maps for the hierarchical clustering of the overlapped 20 DMPs between pSS monocytes and salivary gland epithelial cells.

**Supplementary Figure 2 A.** The GO analysis for the DMPs between anti-SSA+/SSB+ patients and healthy controls. **B.** The GO analysis for the DMPs between anti-SSA+/SSB- patients and healthy controls. **C.** The GO analysis for the DMPs between anti-SSA+/SSB+ patients and anti-SSA+SSB- patients. **D.** The GO analysis of the DMPs between the pSS patients with hyperglobulinemia (IgG>18g/L) and SS patients without hyperglobulinemia.
