eTable 2. Adjustment factors selected in mixed models of associations between air pollutants and SBP and DBP.

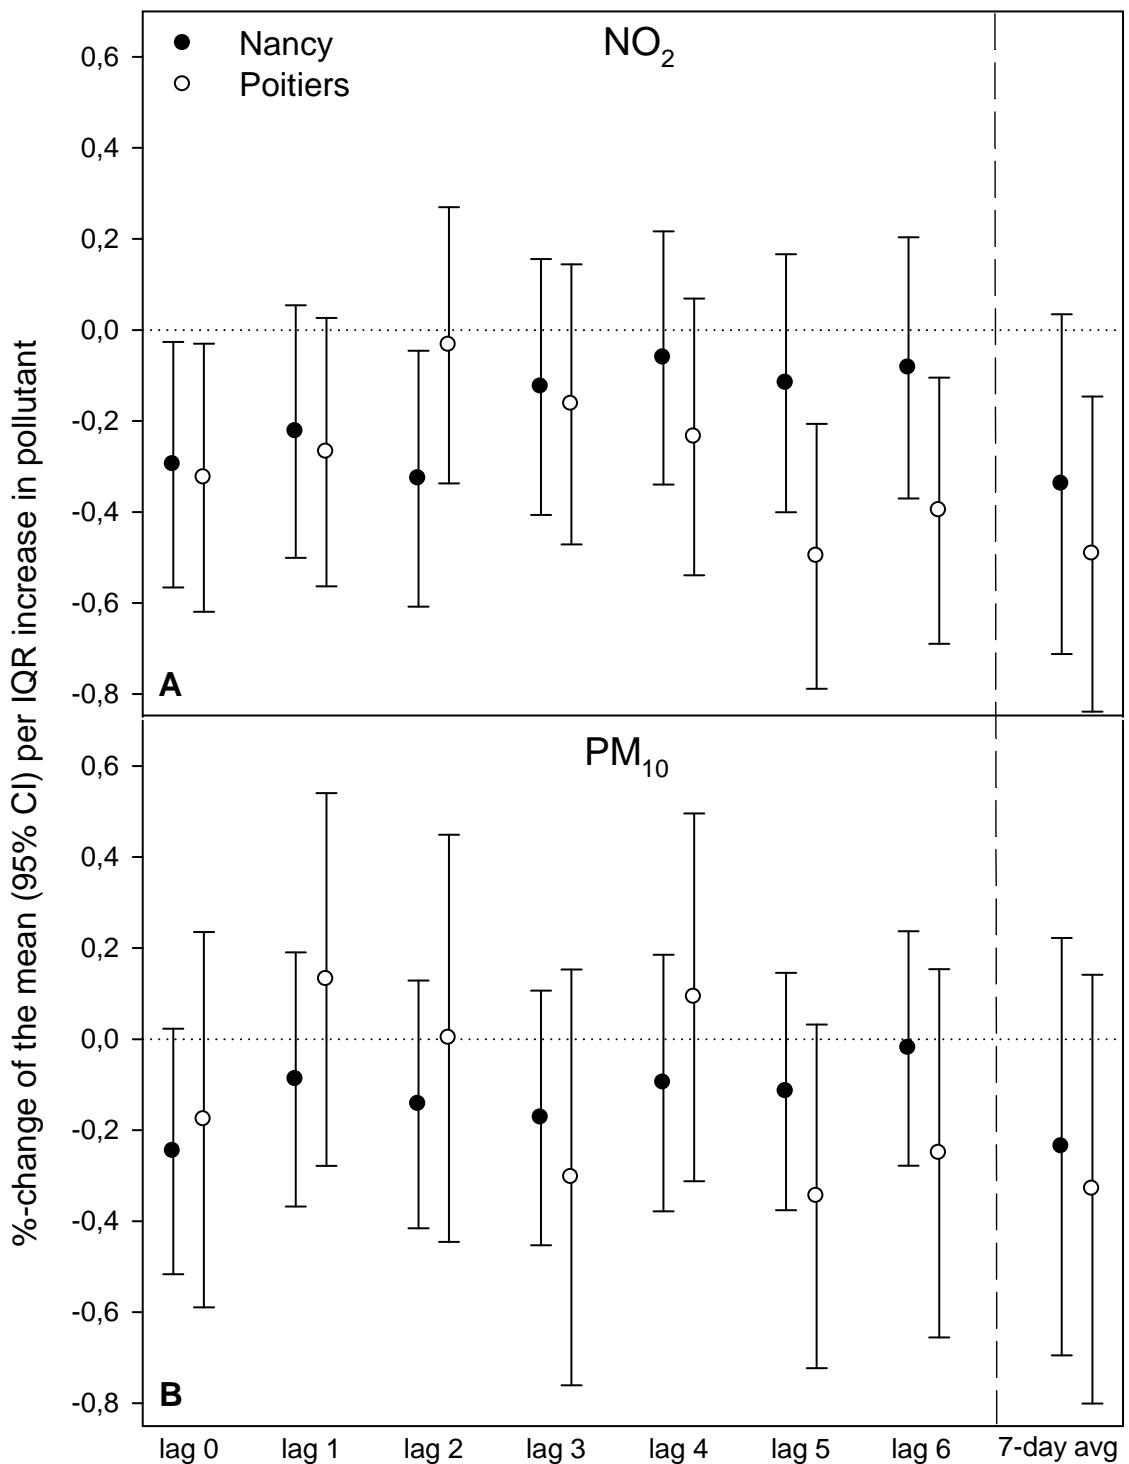

<b>Outcome</b>	<b>Covariate</b>	<b>Shape</b>
<b>SBP</b>		
	Gestational age (weeks)	Cubic
	BMI before pregnancy	Linear
	Previous pregnancies	Categorical
	Age	Cubic
	Smoking (first trimester)	Yes vs. no
	Passive smoking (first trimester)	Yes vs. no
	Time trend	Cubic
	Month	Categorical
	Air temperature	Lag 0, linear
	Relative humidity	Lag 4, quadratic
<b>DBP</b>		
	Gestational age (weeks)	Cubic
	BMI before pregnancy	Linear
	Previous pregnancies	Categorical
	Age	Cubic
	Smoking (first trimester)	Yes vs. no
	Passive smoking (first trimester)	Yes vs. no
	Time trend	Linear
	Month	Categorical
	Air temperature	Lag 4, linear
	Relative humidity	Lag 3, linear
	Barometric pressure	Lag 1, linear
	Weekday	Categorical

SBP: Systolic blood pressure, DBP: diastolic blood pressure, BMI: Body Mass Index.

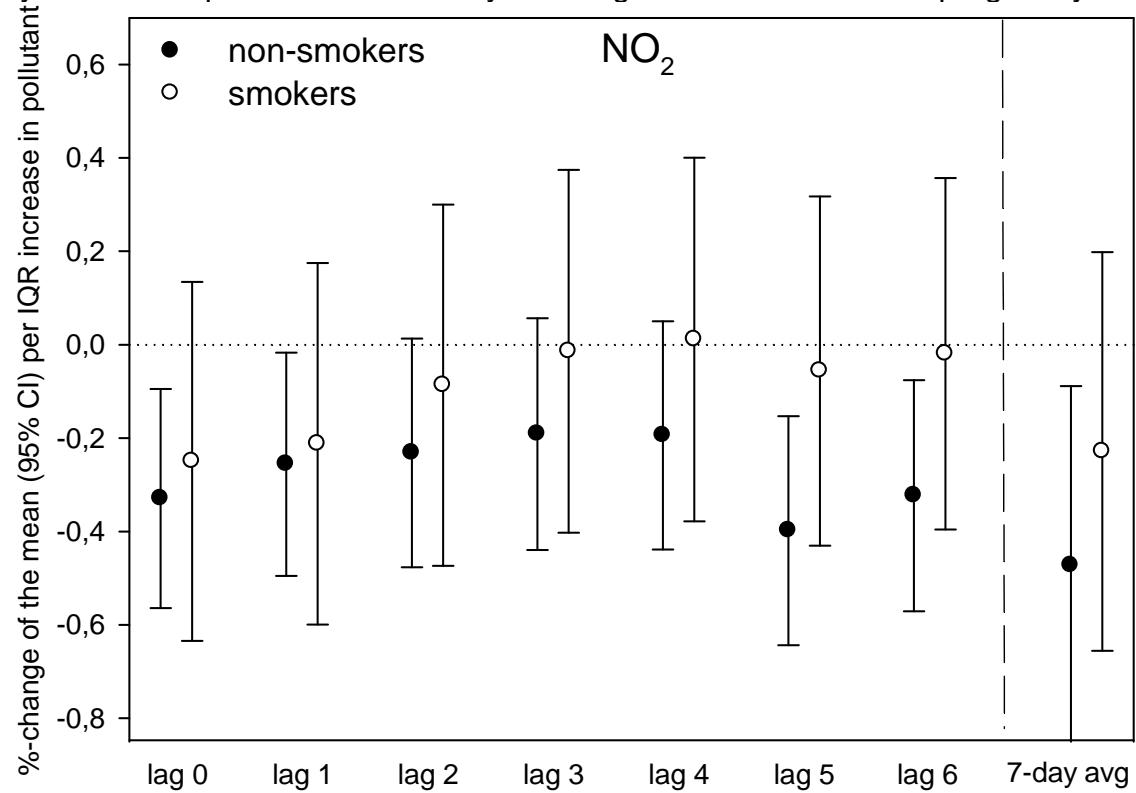

eFigure 1: Location of the air pollution monitoring stations in Poitiers and Nancy areas, respectively.

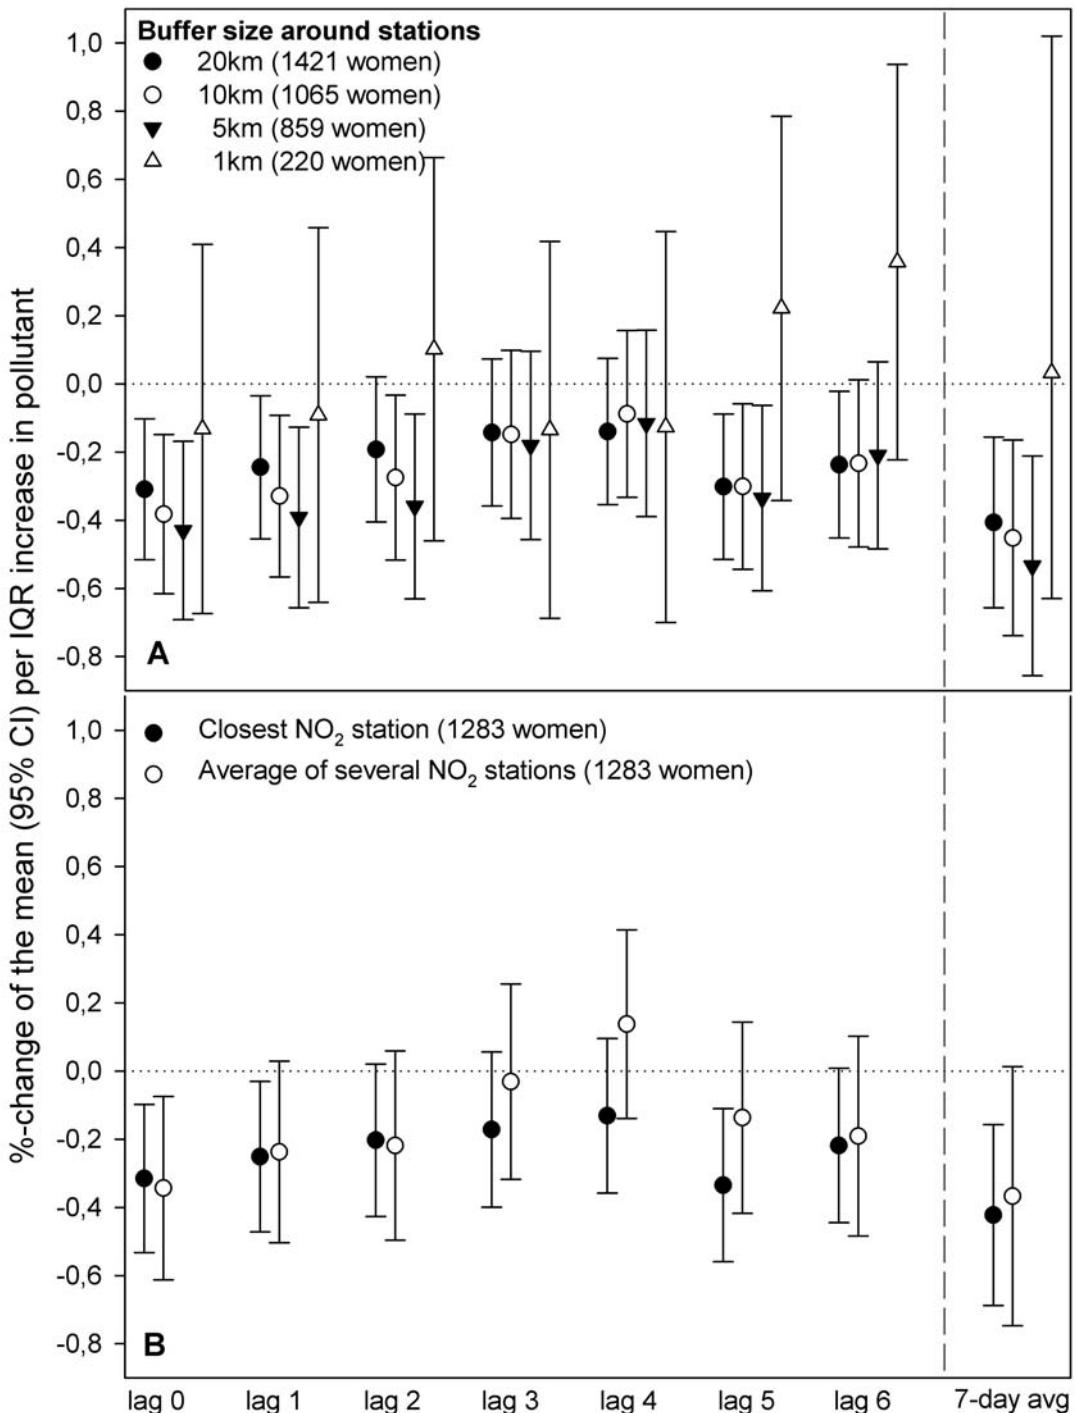

eFigure 2. Adjusted associations between 24-hour and 7-day  $\text{NO}_2$  and  $\text{PM}_{10}$  averages and systolic blood pressure (interquartile range increases) modified by study center.

eFigure 3. Adjusted associations between an increase in 24h-averages of  $\text{NO}_2$  on systolic blood pressure modified by smoking in the 1<sup>st</sup> trimester of pregnancy.

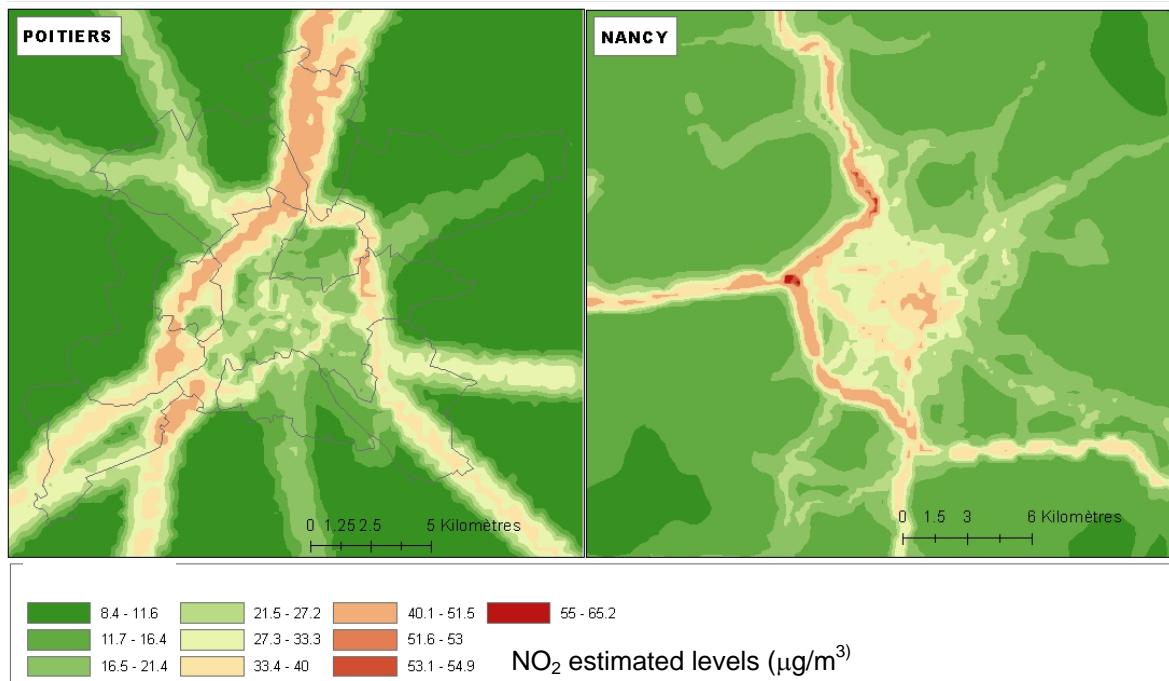

eFigure 4. A) Adjusted associations between an increase in 24h-averages of NO<sub>2</sub> on systolic blood pressure (SBP) in pregnant women living less than 20 km, 10 km, 5 km, and 1 km to the closest station. B) Adjusted associations between an increase in 24h-averages of NO<sub>2</sub> on SBP in pregnant women estimating NO<sub>2</sub> either from the closest air quality monitoring station or from an average of all stations from the area (based on the same women).

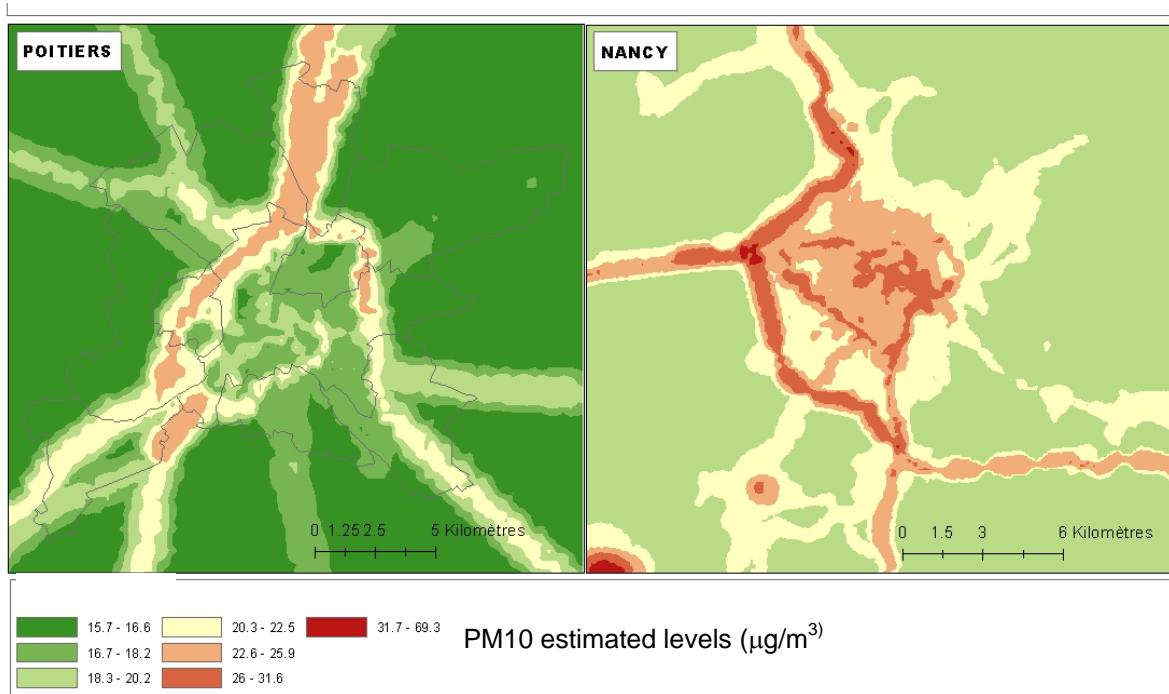

eFigure 5: Modeled NO<sub>2</sub> (A) and PM<sub>10</sub> (B) concentrations estimated by dispersion modeling in Poitiers and Nancy areas. Concentrations are yearly estimates for the year 2005; the model was implemented with ADMS-Urban software (CERC, Cambridge, UK). A. Hulin, V. Navel, F. Caïni, Atmo Poitou-Charentes and J. Galineau, Airlor.

**A**

**B**

eFigure 6. Adjusted associations between air pollutants (7-day averages, as estimated from the closest monitoring station or from a dispersion model) on blood pressure in pregnant women.
