

Supplementary Figure 2.

Relative positions of *FCGR3A* and *FCGR3B* polymorphisms, and primers for the *FCGR3A*-Sanger and *FCGR3B*-Sanger genotyping assays. Primers 1 and 4 were used for PCR amplification and PCR products were sequenced using primers 2 and 3. Polymorphisms in *FCGR3A* and *FCGR3B* are denoted as "X" and differences between the *FCGR3A* and *FCGR3B* genes as "#". For the C__25815666_10 TaqMan assay, a primer (indicated by an asterisk) is located over the rs449443 polymorphism.
