

Supplemental Table 3. Bacterial lineages used to sort IBD from healthy pediatric controls. Results from Random Forests classifier of 97% ID OTUs (species-level phylotypes) that discriminate the fecal microbiota according to health (healthy pediatrics v. IBD).

OTU-ID	Taxonomic assignment	Importance Score		Relative abundance of 97% ID OTU in each group (mean ± SD)			
		Average	Standard Error	Pediatric Healthy		IBD
