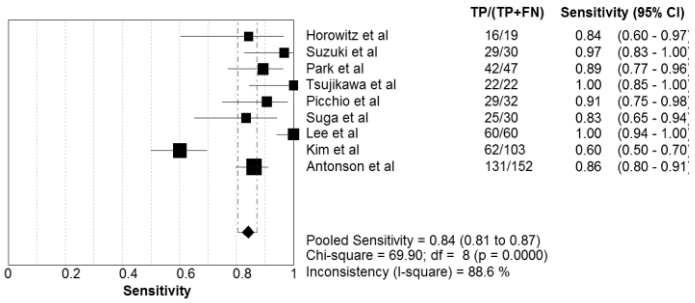
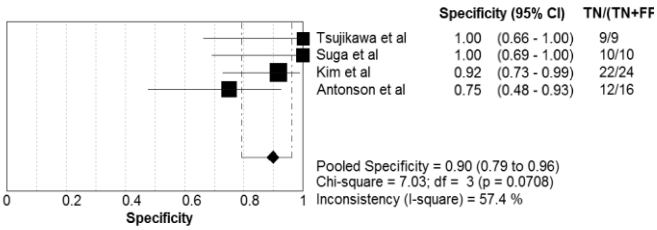
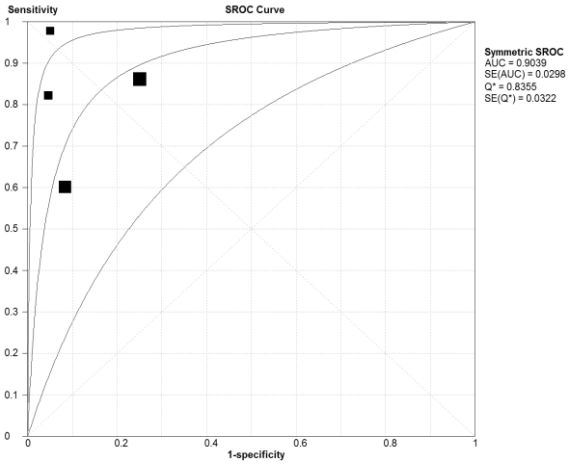
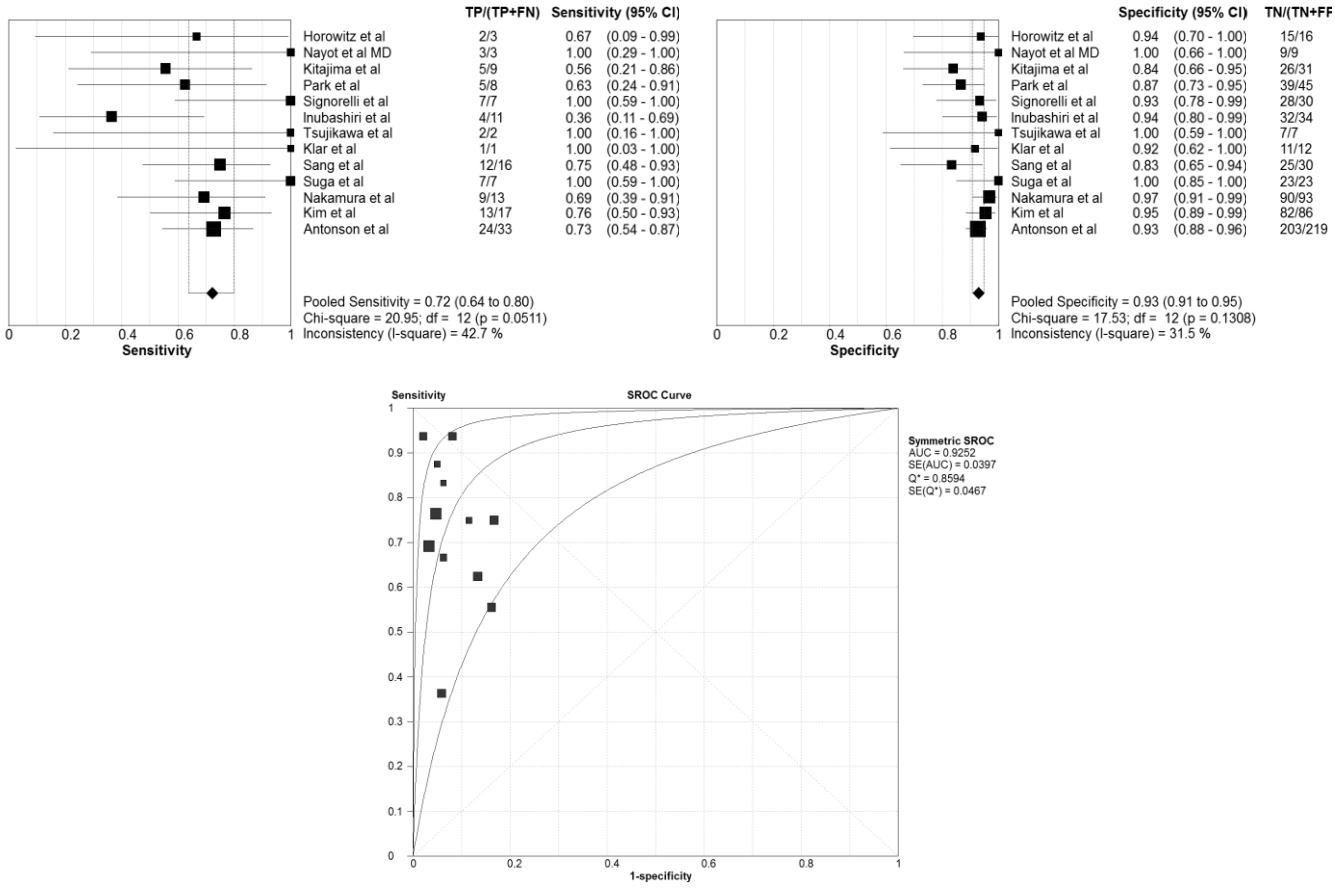
Supplementary file 1: Forest plots of pooled sensitivity and specificity as well as the SROC curve for primary lesion detection.



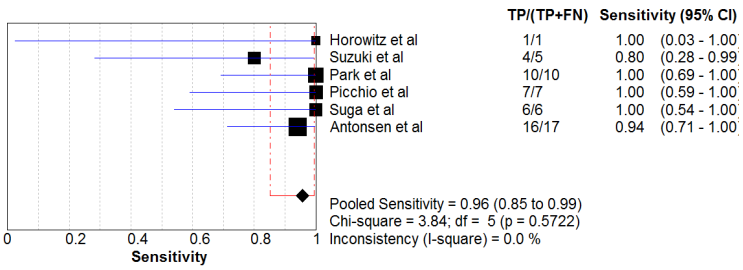


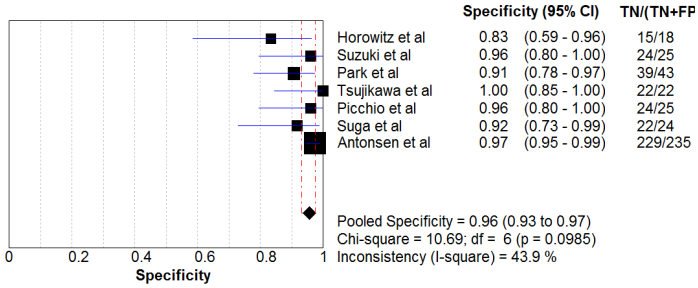


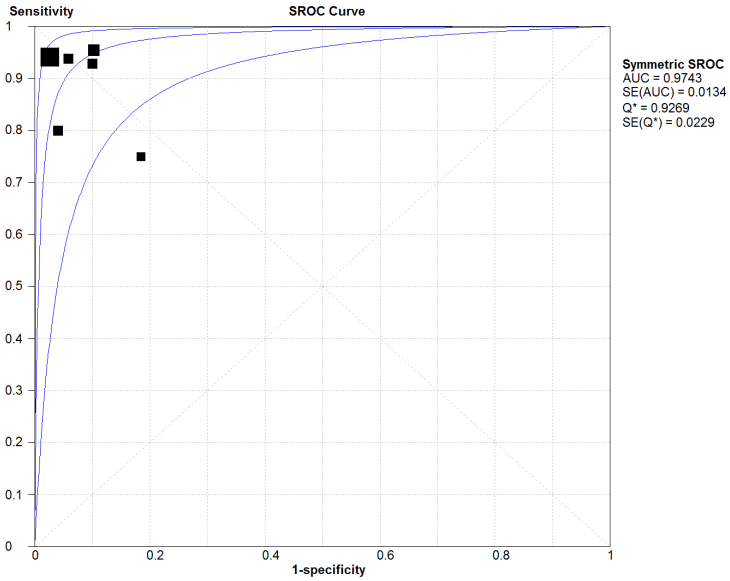
Supplementary file 2: Forest plots of pooled sensitivity and specificity as well as the SROC curve for lymph node staging.

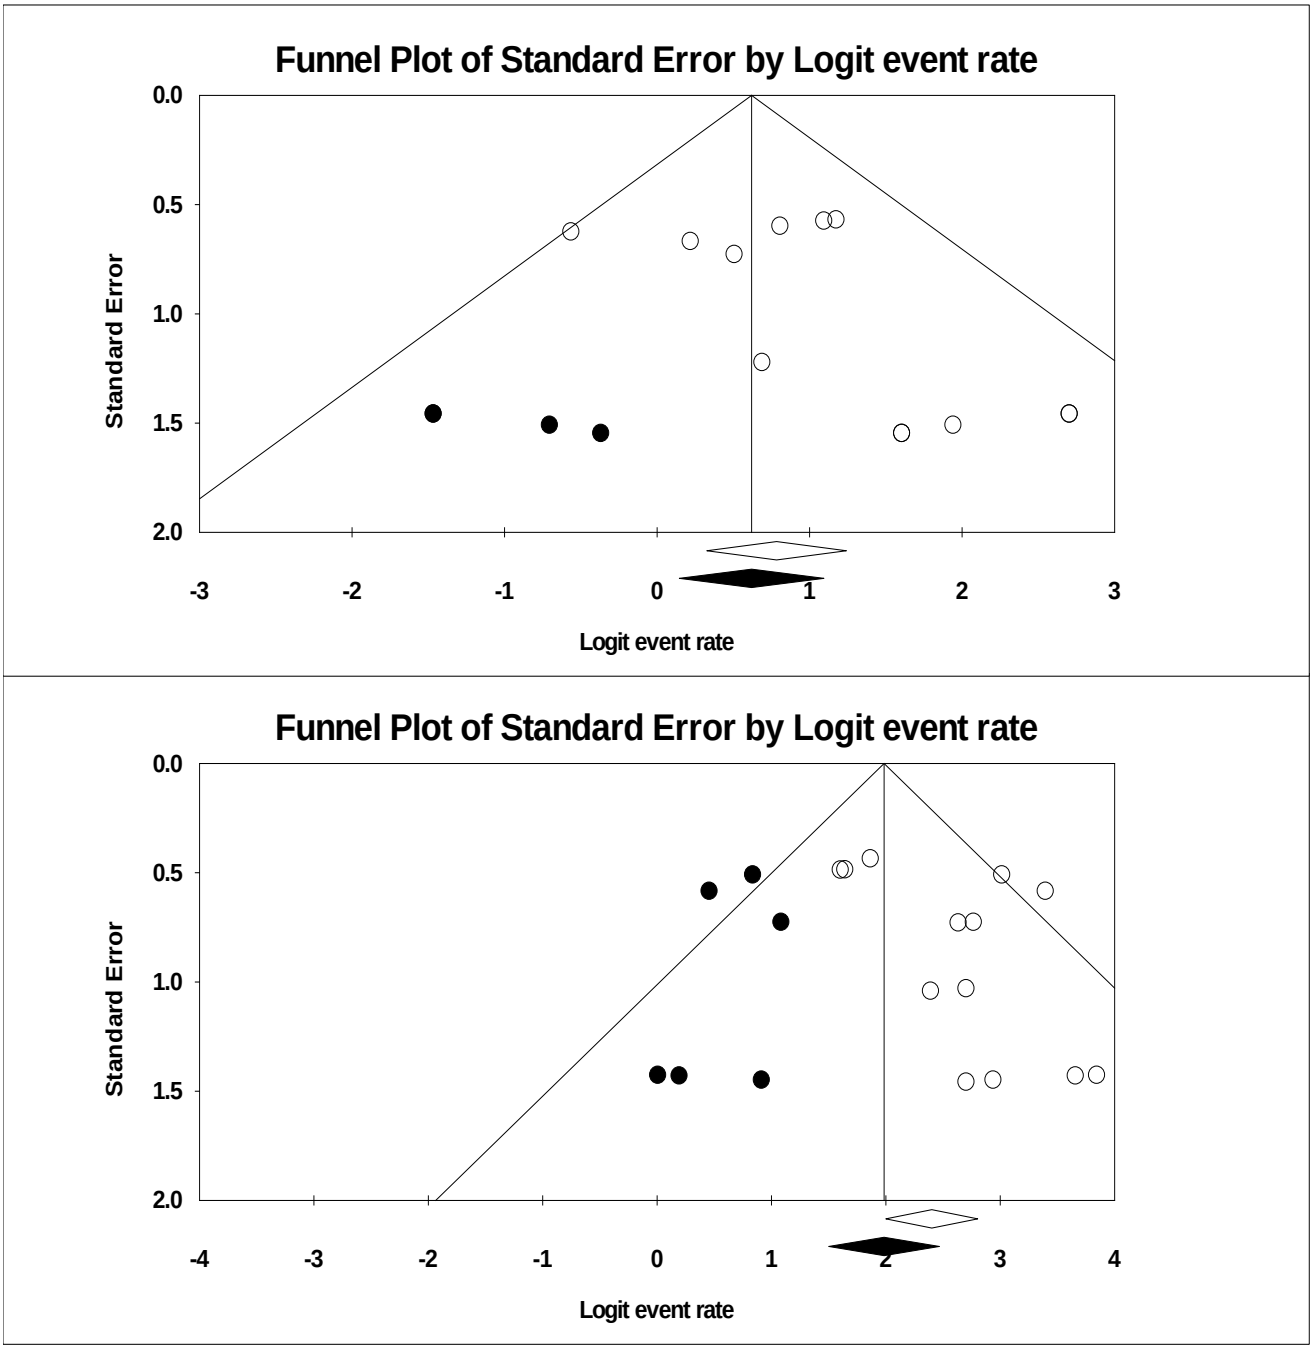


Supplementary file 3: Forest plots of pooled sensitivity and specificity as well as the SROC curve for distant metastases detection.









Supplementary file 4: Funnel plots of sensitivity (top), and specificity (bottom) pooling for lymph node staging. The white diamonds are observed pooled indices and the black diamonds are adjusted ones using trim and fill method.
