

TABLE E-1 Clinical Grading System*

Parameter	Points
Pain	
None	6
Slight or intermittent	5
After walking but resolves	4
Moderately severe but patient is able to walk	3
Severe, prevents walking	2
Walking	
Normal	6
No cane but slight limp	5
Long distance with cane or crutch	4
Limited even with support	3
Very limited	2
Unable to walk	1
Range of motion [†]	
95%-100%	6
80%-94%	5
70%-79%	4
60%-69%	3
50%-59%	2
<50%	1
Clinical score [‡]	
Excellent	18
Very good	17
Good	15 or 16
Fair	13 or 14
Poor	<13

*The system of Letournel and Judet³, with modifications from Matta⁶ and Moed et al.⁹. [†]Expressed as the percentage of the value obtained from the normal contralateral hip. [‡]Determined by adding the points for pain, walking, and range of motion.
