

TABLE E-1 Surgical Approaches and Six-Week Postoperative Correction Parameters for Nonrevision and Revision Groups

	Nonrevision Group*	Revision Group*	P Value
Surgical factor			
Posterior approach	92.0%	89.5%	0.400
Anterior approach	2.0%	0.0%	0.496
Osteotomy performed	60.0%	55.3%	0.355
Three-column osteotomies	17.8%	30%	0.238
Six-week postoperative radiographic parameter			
Pelvic tilt	19.32°	21.71°	0.188
Lumbar lordosis	52.49°	53.21°	0.766
Thoracic kyphosis	-36.49°	-40.71°	0.108

\*The values are given as the mean.
