

Table 5 Draft Total Knee Arthroplasty Expectations Survey – Test-Retest Reliability (62 patients)

<u>Survey item</u>	<u>Kappa Values</u>	<u>Cited in 1st Interview *</u>	<u>Cited in 2nd Interview *</u>
Pain relief	.6	94	95
Improve walking	-	100	100
Remove need for a cane, crutch or walker	.7	42	44
Make knee or leg straight	.6	66	74
Improve ability to go up stairs	.7	97	98
Improve ability to go down stairs	.8	95	97
Improve ability to kneel	.3 (.4) †	77	84
Improve ability to squat	.2 (.4) †	77	81
Improve ability to use public transportation or drive	.6	66	77
Be employed	.7	15	16
Improve ability to participate in recreational activities	.4	90	95
Improve ability to perform activities of daily living	.1 (.3) †	90	92
Improve ability to exercise or participate in sports	.4	90	94
Improve ability to change position	.4	90	94
Improve ability to care for or interact with others	.5	73	82
Improve sexual activity	.7	47	50
Improve psychological well-being	.2 (.4) †	73	79
For the knee to be back to the way it was before symptoms started	.3 (.3) †	86	77

* Values given in percents

† Values given as weighted kappa
