

TABLE E-1 Relevant Studies Investigating Effect of Tendon-Bone Contact Length on Construct Strength				
Authors	Journal	Year	Model	Conclusion
Greis et al. ³⁴	American Journal of Sports Medicine	2001	Mongrel dogs. Not an ACL model	Difference found in strength between 10-mm tunnels and 20-mm tunnels at 6 weeks
Yamazaki et al. ³¹	Knee Surgery, Sports Traumatology, Arthroscopy (KSSTA)	2006	Canine ACL reconstruction	No difference in strength between 5 and 15 mm at time 0 or 6 weeks
Zantop et al. ³²	American Journal of Sports Medicine	2008	Goat ACL reconstruction	No difference in strength between 15 and 25 mm at 6 or 12 weeks
Qi et al. ³⁰	Arthroscopy	2011	Canine ACL reconstruction	No difference in strength between 15 and 20 mm at time 0 or 6 weeks
