

Fig. E-1
 Scatterplot showing the change in contralateral knee pain (the change in the WOMAC score per year) between three and twenty-four months against the index knee pain (WOMAC score) at three months after total knee arthroplasty.

TABLE E-1 Mean Change per Year (Between Three and Twenty-Four Months) in WOMAC Score for the Contralateral Knee According to WOMAC Score Category for the Index Knee at Three Months

Index Knee Pain at 3 Months	WOMAC Score (points)	Change per Year in WOMAC Score for Contralateral Knee (points)		N
		Mean	Standard Deviation	
None to mild	76 to 100	-3.64	9.30	198
Mild to moderate	51 to 75	-2.89	9.84	166
Moderate to severe	26 to 50	-4.98	9.77	48
Severe to extreme	0 to 25	-6.32	13.57	8
