Fig. E-1
T1-weighted coronal magnetic resonance image showing
the data point created at the popliteus insertion.

Fig. E-2
T1-weighted axial magnetic resonance image showing the
data point created at the lateral epicondyle.

Fig. E-3
T1-weighted sagittal magnetic resonance image showing
the data point created at the popliteus insertion.

Fig. E-4
T1-weighted sagittal magnetic resonance image showing
the data point created at the central portion of the
insertion, or footprint, of the anterior cruciate ligament.
