

TABLE E-1 Intraoperative Grading of Articular Cartilage Lesions According to the Beck Criteria <sup>3</sup>		
Description	Criteria	No. of Samples
Normal	Macroscopically sound cartilage	3/25
Chondromalacia	Roughening of surface, fibrillation	13/25
Debonding	Loss of fixation to the subchondral bone, macroscopically sound cartilage; carpet phenomenon	0/25
Cleavage/thinning	Loss of fixation to the subchondral bone; frayed edges, thinning of the cartilage, flap	5/25
Defect	Full-thickness defect	4/25
