

TABLE E-1 The Individual Analysis of the Failures in Terms of Stability

Patient/ Gender/Age at Surgery	Major Cause of Failure	Type of Failure	Time Period Between Failure and Index Procedure	Action Taken	Specific Comments at Follow-up
1. Male 14 y	No specific	Several subluxations	3 years	None	Subjectively excellent, Constant score 83 points
2. Male 27 y	Lifting at work	Subluxation at 6 months, then 5 redislocations	6 months	None	No problems for 3 years, Constant score 84 points
3. Female 18 y	Volleyball	Subluxation at 1 year, then several redislocations	1 year	Revision scheduled	Constant score 66 points, Sulcus sign positive
4. Male 23 y	Returned to unrestrict- ed work at 3 weeks	Redislocations	5 weeks	Open Bankart at 14 months	No problems after revision, Constant score 82 points
5. Male 20 y	Falling accident	Redislocation with major osseous Bankart lesion	6 months	Revised using bone graft at 7 months	Subjectively excellent, no further recurrence, Constant score 100 points
6. Male 42 y	Skiing accident	Subluxations and redislocations	4 months for subluxation, 7 months for redislocation	Open Bankart at 2 years, bone-grafting at 3 years	Subjectively excellent, no problems after last operation, Constant score 78 points
7. Male 18 y	Mountain climbing	1 redislocation	4 years	None	Subjectively excellent, Constant score 94 points
8. Male 23 y	External rotation during daily activities	1 redislocation	>2 years	None	Subjectively good, Constant score 98 points
9. Male 28 y	No specific	Several redislocations	Soon after surgery, not further specified	None	One redislocation in last 5 years, Constant score 78 points
10. Male 24 y	Falling accident	Redislocations	2 months	Open Bankart at 6 months	Six more redislocations after revision, new procedure considered
11. Male 22 y	No specific	1 subluxation	7 years	None	Subjectively excellent, Constant score 94 points
12. Male 21 y	External rotation	1 subluxation	5 years	None	Subjectively excellent, Constant score 96 points
13. Male 34 y	Wakeboarding	1 redislocation	7 years	None	Subjectively excellent, Constant score 97 points
14. Male 27 y	Diving accident	Several redislocations	5 years	Open Bankart at 5 years	Subjectively poor, Constant score 90 points
15. Male 34 y	Falling in soccer game	1 redislocation	>2 years	Open fixation of large bone fragment	Subjectively excellent, Constant score 91 points
16. Male 26 y	Skiing accident	1 redislocation	6 years	None	Subjectively fair, Constant score 65 points
17. Male 24 y	No specific	1 subluxation	4 years	None	Subjectively excellent, Constant score 89 points
18. Male 30 y	Skiing accident	Several subluxations, 1 redislocation	5 years	Bone-grafting at 9 years	Subjectively excellent, Constant score 92 points
19. Male 16 y	Bicycle accident	1 subluxation	1 year	None	Subjectively excellent, Constant score 93 points
20. Male 25 y	No specific	1 subluxation	8 years	None	Subjectively excellent, Constant score 81 points
21. Male 24 y	No specific	1 subluxation	3 years	None	Subjectively excellent, Constant score 96 points
22. Male 23 y	Snowboarding	1 redislocation	9 years	None	Subjectively good, Constant score 95 points

23. Male 22 y	Bicycle accident	Several subluxations	6 years	None	Subjectively poor, Constant score 95 points, revision considered
24. Male 40 y	Mountain climbing	Several subluxations	>2 years	None	Subjectively excellent, still occasional subluxations, Constant score 98 points
25. Male 40 y	Volleyball	1 subluxation	3 years	None	Subjectively fair, pain on apprehension testing, Constant score 96 points
26. Male 45 y	Falling accident	1 subluxation, three dislocations	1 year	None	Subjectively good, Constant score 70 points, had 1 subluxation and 3 dislocations, last dislocation within 1 year prior to follow-up examination of study
27. Female 39 y	No specific	Several subluxations	3 years	None	Subjectively fair, Constant score 47 points, has subluxations every month, takes antidepressive medication
