

Months to Stem Revision for Loosening or Last Follow-Up

Fig. E-1

Kaplan-Meier curve with revision of the femoral component because of aseptic loosening as the end point. Tick marks indicate censored data. Dashed lines indicate 95% confidence intervals.

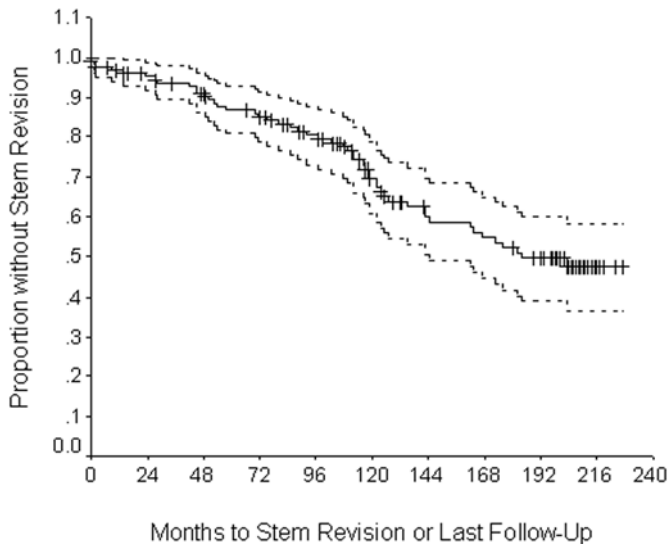

Fig. E-2

Kaplan-Meier curve with revision of the femoral component for any reason as the end point. Tick marks indicate censored data. Dashed lines indicate 95% confidence intervals.
