

Appendix

TABLE E-1 Factors Considered as Potential Predictors for Revision in the Present Analyses*

Criteria	Low Risk Group†	Moderate Risk Group†	High Risk Group†
Patient-related factors			
1. Dysplasia	No	Yes, men with HR	Yes, women with HR
2. UCLA activity level	≤4	5-6	7-10
Symptoms			
3. Local hip symptoms	No pain	Slight or mild pain	Moderate, marked, or severe pain
4. Systemic symptoms	None		Yes
Clinical status			
5. Harris hip score	80-100	70-79	<70
Implant type			
6. Femoral head	Small head (<36 mm) or HR <50 mm in men		Large head (≥36 mm) or HR ≥50 mm in men or any HR in women
7. Recalled MoM prosthesis	No		Yes
Radiographs			
8. Acetabular inclination	Optimal placement		Suboptimal placement
9. Acetabular anteversion	Optimal placement		Suboptimal placement
10. Osteolysis and/or loosening	No		Yes
Metal ion levels			
11. Cobalt or chromium (ppb)	<3	3-10	>10

*Adapted from Kwon et al.⁸. †HR = hip resurfacing.
