## Norvell et al. Effectiveness and Safety of Ankle Arthrodesis Versus Arthroplasty: A Prospective Multicenter Study http://dx.doi.org/10.2106/JBJS.18.01257

| Question Text                                                                                                                                                                                                                                                                                                            | Author<br>Response | Custom<br>Submission<br>Question ID |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------|
| Please complete the following questions in accordance with the <u>International Committee of Medical Journal Editors'</u> recommendations on data sharing in clinical trials (guidelines and examples are available <a href="here">here</a> Will individual participant data be available (including data dictionaries)? | No.                | 54                                  |
| What data in particular will be shared? (Examples include all individual participant data after deidentification, only participant data that underlies the results, or not available.)                                                                                                                                   | NA                 | 55                                  |
| What other documents will be available?                                                                                                                                                                                                                                                                                  | NA                 | 56                                  |
| When will data be available (start and end dates)?                                                                                                                                                                                                                                                                       | NA                 | 57                                  |
| With whom? (Examples include anyone who wishes to access the data, researchers who provide a proposal, or not applicable.)                                                                                                                                                                                               | NA                 | 58                                  |
| For what types of analyses?                                                                                                                                                                                                                                                                                              | NA                 | 59                                  |
| By what mechanism will data be made available?                                                                                                                                                                                                                                                                           | NA                 | 60                                  |
