

Question Text	Author Response	Custom Submission Question ID
Please complete the following questions in accordance with the International Committee of Medical Journal Editors' recommendations on data sharing in clinical trials (guidelines and examples are available here). Will individual participant data be available (including data dictionaries)?	yes	54
What data in particular will be shared? (Examples include all individual participant data after deidentification, only participant data that underlies the results, or not available.)	All of the individual participant data collected during the trial, after deidentification	55
What other documents will be available?	Study protocol, statistical analysis, informed consent form, and study protocol	56
When will data be available (start and end dates)?	3 months after publication and terminating 36 months following article publication	57
With whom? (Examples include anyone who wishes to access the data, researchers who provide a proposal, or not applicable.)	Investigators whose proposed use of the data has been approved by an independent review committee	58
For what types of analyses?	For independent participant analysis and meta analysis	59
By what mechanism will data be made available?	Data may be requested from lead author Brian Badman. A data access agreement will need to be signed prior to sharing.	60
