

## Appendix B: iKNOW-PD Survey 2 Assessment Battery Ranking

Thank you for your participation in the iKNOW-PD Assessment Battery. The purpose of this survey is to give you the opportunity to provide your input on what you believe should be the 3-5 outcome measures that GIPT decides to include as part of the assessment battery for patients with PD. Take the time to review the information provided in the Google drive or the Outcome Measure Summary document. The measures selected for the survey were those that were selected by the Academy of Neurologic PT as having the best evidence for use in people with PD. Your results are anonymous and will only be used to guide the discussion on March 12th.

Rate your level of agreement for including the listed outcome measure being included in the GIPT assessment battery for people with PD.

|  | Strongly<br>Disagree | Neutral | Strongly<br>agree |
|--|----------------------|---------|-------------------|
|  | 0                    | 5       | 10                |
| MDS-UPDRS revision-part 3 (motor examination)            |                      |         |                   |
| MDS-UPDRS-part 1 (non-motor experiences of daily living) |                      |         |                   |
| Six minute walk  |                      |         |                   |
| 10 meter walk  |                      |         |                   |
| miniBESTest  |                      |         |                   |
| MDS-UPDRS-part 2 (motor experiences of daily living)     |                      |         |                   |
| Functional Gait Assessment                               |                      |         |                   |
| Five times sit to stand                                  |                      |         |                   |
| 9 hole peg test  |                      |         |                   |
| Parkinson's Disease Questionnaire-39                     |                      |         |                   |
| Parkinson's Disease Questionnaire-8                      |                      |         |                   |
| Freezing of gait questionnaire                           |                      |         |                   |
| Parkinson's Fatigue Scale                                |                      |         |                   |
| Activities Specific Confidence Scale                     |                      |         |                   |
| Timed Up and Go Cognitive                                |                      |         |                   |

For the measures that you "strongly agreed" with, briefly provide your rationale.  
(Optional)

For the measures that you "strongly disagreed with, briefly provide your rationale.  
(Optional)

How many outcome measures do you believe are appropriate to include as part of the PD assessment battery at GIPT?

- ☐ 2
- ☐ 3
- ☐ 4
- ☐ 5
