

Please indicate your level of agreement with the following statements:

Item #	Strongly Disagree	Disagree	Neither	Agree	Strongly Agree
1. Our hospital has a coordinated system for managing quality data.	①	②	③	④	⑤
2. Magnet quality indicator data influences nursing practice changes in my hospital.	①	②	③	④	⑤
3. It is easy to get quality indicator reports from the Electronic Health Record.	①	②	③	④	⑤
4. Our hospital has dedicated support personnel to analyze, report, and articulate data.	①	②	③	④	⑤
5. Our hospital has a culture of continuous quality improvement in place.	①	②	③	④	⑤
6. Multiple competing quality initiatives make it difficult to complete Magnet requirements.	①	②	③	④	⑤
7. Staff RNs plan projects that include use of meaningful "before" and "after" measures.	①	②	③	④	⑤
8. Too many personnel hours are needed to meet Magnet quality indicator requirements.	①	②	③	④	⑤
9. Our hospital is able to create trend charts with axis labels, data labels, and data tables.	①	②	③	④	⑤
10. Measuring Magnet quality indicators is valuable to our hospital.	①	②	③	④	⑤
11. Our practice area has benchmarks available.	①	②	③	④	⑤
12. Benchmark databases provide meaningful feedback on quality indicators.	①	②	③	④	⑤
13. Increasing regulatory obligations limit our resources to measure outcomes.	①	②	③	④	⑤
14. Current Magnet indicators are not meaningful for quality care improvement.	①	②	③	④	⑤
15. Staff RNs understand why "before" and "after" quality outcome measurement is important.	①	②	③	④	⑤
16. Daily operating priorities limit administrative participation in Magnet quality processes.	①	②	③	④	⑤
17. The cost required to comprehensively manage Magnet quality outcomes is too high.	①	②	③	④	⑤
18. There is clear communication to RNs about required Magnet quality indicators.	①	②	③	④	⑤
19. External vendors exist that provide unit-based indicator benchmarks needed for Magnet.	①	②	③	④	⑤
20. The only reason we track some indicators is to meet Magnet requirements.	①	②	③	④	⑤
21. Our hospital consistently establishes defined outcome measures before initiating projects.	①	②	③	④	⑤

Best Practices in achieving Nursing outcomes:

Overcoming barriers may be enhanced by sharing of best practices. If you are aware of a practice that has succeeded in addressing and demonstrating nursing practice outcomes, please provide contact information for a person or facility that can give the researcher further information related to the best practice.

Item # from above list:	Name of contact person:
Or description of best practice:	Hospital Name:
	City and State:
	Phone if known:
	Email if known:

Thank you for your input.
