

**Supplementary Figure 13: Kaplan-Meier plots of PFS (A) and OS (B) in patients with low and high cytoplasm TS expression (H-score) (N = 60)**

Abbreviations: expr., expression; IHC, immunohistochemistry; N, number of patients evaluated;

OS, overall survival; PFS, progression-free survival; TS, thymidylate synthase.

High and low TS IHC expression in the cytoplasm: TS cytoplasm H-score < 100 and  $\geq$  100 for PFS; TS cytoplasm H-score < 150 and  $\geq$  150 for OS, respectively.
