

Supp. Table 1. Baseline characteristics of the included 450 patients

Variables	Value
Age (years): mean (range)	30 (18–45)
Gender (female): number (%)	395 (87.8%)
Ptosis: n (%)	
Bilateral	360 (80.0%)
Unilateral	90 (20.0%)
Eyelids underwent modified surgery: number (%)	
Right	390 (48.15%)
Left	420 (51.85%)
Family history of eye abnormalities: number (%)	0
Eye trauma: number (%)	0
Previous eyelid surgical history: number (%)	200 (24.7%)
MRD 1 (mm): mean \pm SD	1.7 \pm 0.5
Palpebral fissure asymmetry: n (%)	250 (55.6%)

Abbreviations: MRD1, marginal reflex distance 1; SD, standard deviation.
