

**Supplemental figure 1. Scatter plots inclusive Spearman correlation coefficients between serum calprotectin and fecal calprotectin C-Reactive Protein and with a maximum of SC 3750 ng/ml measured in ulcerative colitis patients in study A**

Abbreviations: SC: Serum Calprotectin; FC: Fecal Calprotectin; CRP: C-reactive Protein

**Supplemental figure 2: Scatter plots of fecal calprotectin and disease parameters from study A and study B. Spearman correlation coefficients are presented in data from study A.**

Abbreviations: UC: ulcerative colitis; CD: Crohn's Disease; UCEIS: Ulcerative Colitis Endoscopic Severity Index; FC: Fecal Calprotectin; PUCAI: Pediatric Ulcerative Colitis Activity Index; aPCDAI: abbreviated Pediatric Crohn's Disease Activity Index.
