

eFig 1. Neuropsychological profile of Case 1. Free and Cued Selective Reminding Test (FCSRT) with the following determinations: RLT: Free memory, RT: Total memory, RD: Delayed memory, RDT: Total delayed memory. Rey-osterrieth complex figure test (ROCF). Trail-Making Test A (TMTA). Trail-Making Test B (TMTB). Ineco Frontal Screening (IFS). Fluency test P (FP). Fluency test Animals (Fan). Direct digit (DD). Inverse digit (DI). All tests have been scored using scalar punctuations. We represent the results on a bar chart for each patient, which includes the pre-CNB (blue bar) and post-CNB (orange bar) score.
