

Resource VII: Guiding Question Format

APTA Section on Pediatrics
Congenital Muscular Torticollis Clinical Practice Guideline
First Round Review - Guiding Questions

Reviewer ID number: _____

Part 1

This table contains the list of recommended Action Statements from the guideline (Lines #-#). Based solely on your reading of each Action Statement, please rate the clarity and feasibility of each action statement. These statement ratings should be completed before reading the manuscript.

Action Statement	Clarity: Is the action clear and would you know how to carry it out?			Feasibility: How realistic is it that you could implement this action statement into your practice.		
	Clear	Somewhat clear	Not clear	Feasible	Somewhat feasible	Not feasible

First Round Review - Guiding Questions

Part 2

After completing the table above, proceed with your review of the full manuscript. Remember that your comments should address:

- a. Validity of the guideline: are the recommendations supported by relevant and complete literature; it is clear which recommendations are based on evidence and which are based on expert opinion.
- b. Reliable and reproducible: do you arrive at the same conclusions.
- c. Feasibility - are the recommendations clear, reasonably flexible and can you apply them in the appropriate clinical settings.
