

No.	CORE OUTCOME SET	Page No.
Oncological Outcomes		
1	Rate of histologically confirmed locoregional cancer recurrence included?	
Clinical Outcomes		
2	All complications - including the actual number, percentage and the Clavien-Dindo Grading, included?	
Aesthetic and Functional Outcomes		
3	Surgeon assessment of volume, shape, symmetry, scarring and any improvement in skin trophicity/ quality post-fat grafting (e.g. in radiated breasts) included?	
4	Ability to function and complete daily tasks, perform work and leisure related activities, ideally assessed using a validated instrument (e.g. EQ-5D, BREAST-Q), included?	
Patient Reported Outcomes		
5	Overall patient-reported satisfaction with the appearance of their breast(s) after surgery, ideally using a validated instrument (e.g. BREAST-Q), included?	
6	Impact on quality of life, e.g. self-esteem (feeling self-confident), emotional wellbeing (feelings of emotional and psychological health after surgery), normality (feeling 'back to normal self' or 'whole' as a result of surgery) discussed?	
Process Outcomes		
7	Number of fat grafting sessions needed to get optimal result as judged by the patient and/or surgeon (who made the judgement should be stated) recorded?	
Radiological Outcomes		
8	The incidence of radiological abnormalities expressed quantitatively (e.g. as a number and a percentage) included?	
9	Any interference with subsequent mammography scanning, expressed quantitatively (e.g. as a number and a percentage), included?
