

**Supplemental Digital Content 3 (SDC 3).** Postoperative lateral views of 1-year follow-up. The reconstructed nipple was asymmetrical to the contralateral nipple as three types of lateral flap folding were used. **(a)** This pattern of nipple outcome followed the lateral flap folding shown in SDC 2(a). **(b)** This pattern of nipple outcome followed the lateral flap folding shown in SDC 2(b). **(c)** This pattern of nipple outcome followed the lateral flap folding shown in SDC 2(c).
