

## **SUPPLEMENTAL FIGURES**

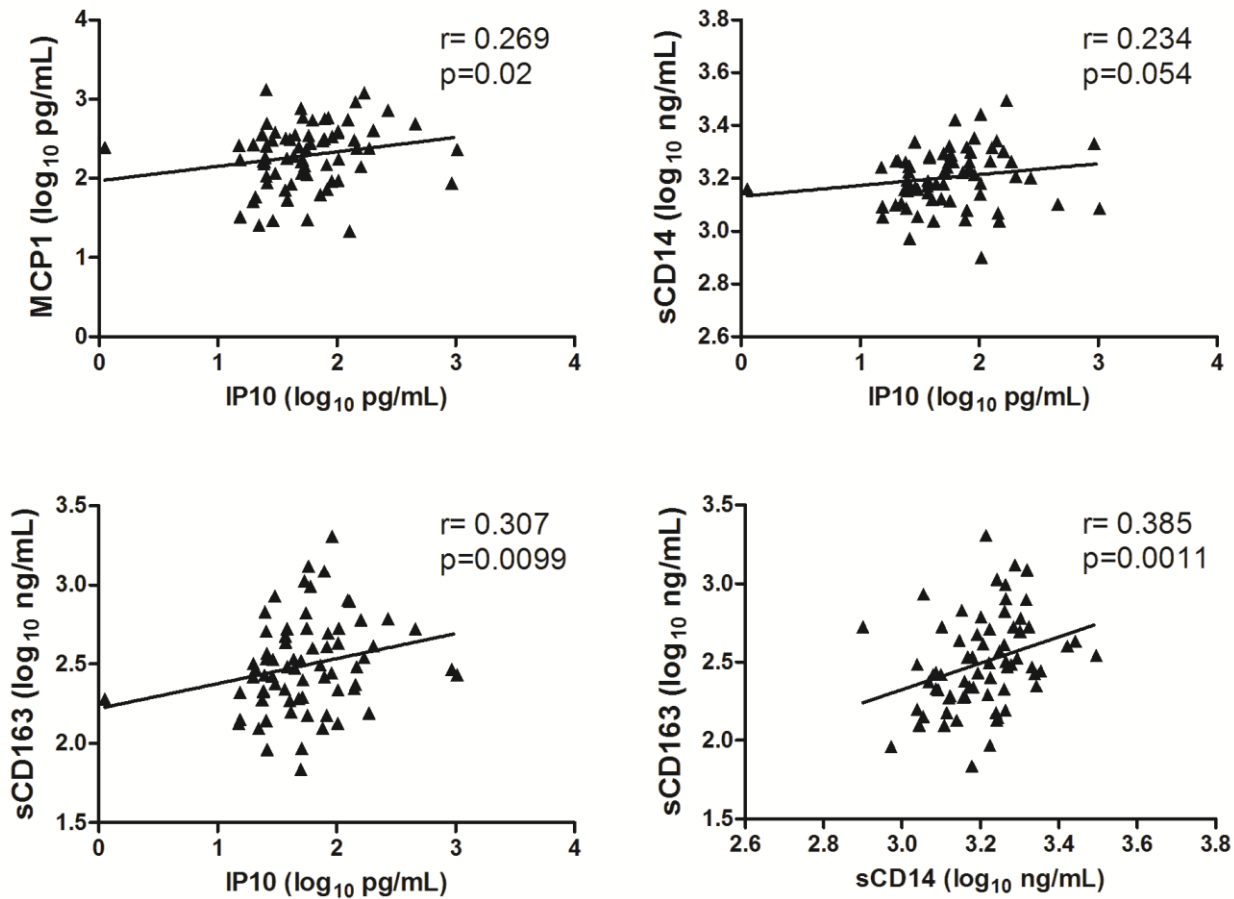

Supplemental Figure 1. Relationships (in HICs) between IP10 levels on one hand and sCD14, sCD163 and MCP1 levels on the other, and between sCD14 and sCD163 levels ( $\log_{10}$  transformation).

Supplemental Figure 2. Repeated measurements of IP10 at day 0, M12 and M24 in HICs. There were no significant differences between the IP10 levels at the three time points (in a Wilcoxon rank-sum test).
