

Supplementary Digital Content 1: Table of Minimum Requirements for Health Facilities to Graduate as ART Initiator Clinics (Hubs) or Spokes in Swaziland during 2004–2010*

	ART Initiator Clinic (Hubs)	Spokes
Human resources	<ul style="list-style-type: none"> • Doctor visit at least once in two weeks • At least three nurses/nursing assistants should have IMAI training • Case load per nurse per day (for all visits) below 40 patients per nurse per day • Presence of at least one trained support staff (Expert Client or Phlebotomist) • All clinical staff trained on data entry systems (paper-based or computerized, as appropriate, to ensure adequate accountability for drugs and clinical care) • Availability of a dispenser (nurse dispenser or appropriately trained dispenser) 	<ul style="list-style-type: none"> • Doctor or Nurse visit at least once in a month (for supportive supervision and mentoring and to manage referred cases) • At least two nurses/nursing assistants should have IMAI training • All clinical staff trained on data entry systems (paper-based or computerized, as appropriate, to ensure adequate accountability for drugs and clinical care)
Infrastructure	<ul style="list-style-type: none"> • At least two consultation rooms • Well ventilated waiting area • Laboratory/Phlebotomist area • Sample/Specimen transport system (at least once/week) • Data room/ Record storage • Functioning wash rooms for staff and patients • Dispensing area (integrated with all other medications) • Bulk drug storage area (fortified and air conditioned) • Individual counseling area 	<ul style="list-style-type: none"> • At least two consultation rooms • Well ventilated waiting area • Sample/Specimen transport system (at least once/week) • Data room/ Record storage • Functioning wash rooms for staff and patients • Dispensing area (integrated with all other medications) • Bulk drug storage area (fortified and air conditioned) • Individual counseling area
Health management information system	<ul style="list-style-type: none"> • Stock keeping record/ system • Data capturing system (Manual Registers or Computers) • For Electronic registers, must use the National HMIS system for HIV reporting. • Patient files 	<ul style="list-style-type: none"> • Stock keeping record/ system • Data capturing system (Manual Registers or Computers). • Patient files
Standard operational procedures	<ul style="list-style-type: none"> • Documented evidence of a monthly MDT meeting at the facility • Communication forms (referral forms, ART ordering forms) • Reporting mechanisms (Written procedure how to report) • Provider resources (National guidelines) 	<ul style="list-style-type: none"> • Communication forms (referral forms, ART ordering forms) • Reporting mechanisms (Written procedure how to report) • Provider resources (National guide lines)

Abbreviations: IMAI, integrated management of adult illness; HMIS, health management information system; MDT, multi-disciplinary team; ART, antiretroviral therapy

*Items in bold represent differences between criteria for ART initiator clinics and refill clinics

Supplementary Digital Content 2: Sub-population Analysis of Predictors of Death and LTFU among Adults Starting ART at Central Facilities Capable of Down-referral (N=1,516) — Swaziland, 2004–2010

	Original	LTFU						Death						
		Rate/ 100PY	HR	(95% CI)	p	AHR*	(95% CI)	p	Rate/ 100PY	HR	(95% CI)	p	AHR*	(95% CI)
