

Supplemental Figure 1.

Scatterplots depicting baseline associations between cognitive and emotion indices and clinical variables in LTNPs and Progressors.

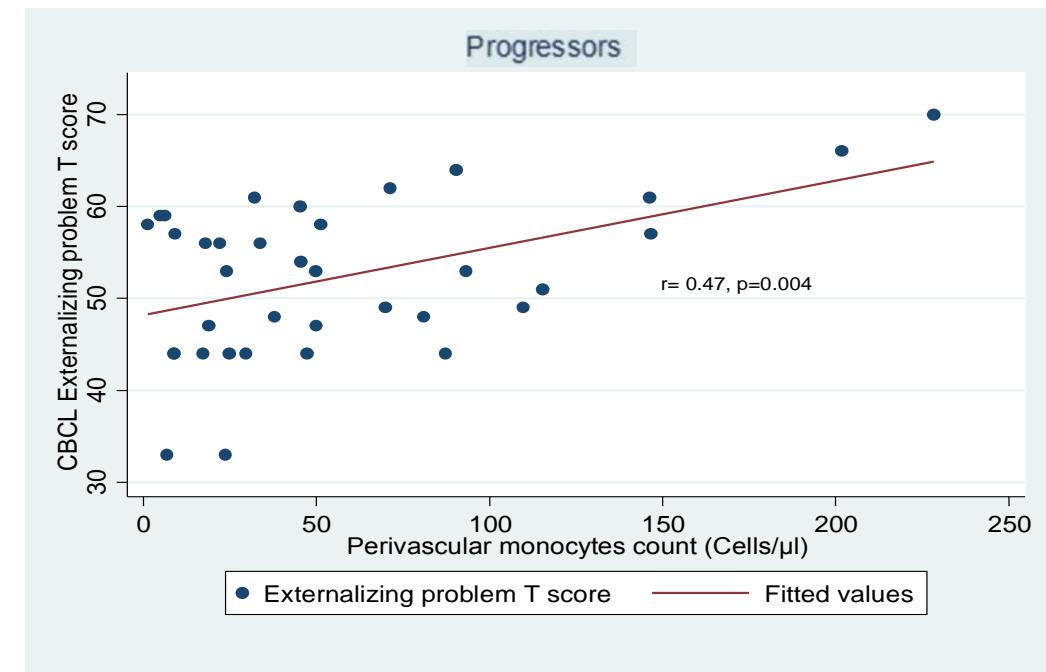

Correlation between performance on the Purdue pegboard and CD8 percent in long-term nonprogressors.

Correlation between Child Behavior Checklist (CBCL) Total Problem Scale and perivascular monocyte count in children with progressive disease (Progressors)

Correlation between Child Behavior Checklist (CBCL) Externalizing Scale and perivascular monocyte count in children with progressive disease (Progressors)
