

Supplemental Digital Content 1. Workshop Content Overview

UNITY	Breast Cancer
Practicing relaxation and self-care	Discussing racial disparities in breast cancer, including African American community awareness of them and potential contributing factors
Sharing coping strategies for experienced stigma with other group members	Sharing barriers (e.g., knowledge, logistics) to breast cancer screening and treatment with other group members
Viewing and discussing trigger videos about HIV-related stigma	Viewing and discussing a video and case studies about African Americans engaging in breast cancer screening and treatment
Role playing how to handle potentially stigmatizing situations with family, in the workplace, and in other settings	Discussing how to pursue social interactions about breast cancer with doctors and how to access social support to obtain breast cancer screening
Role playing disclosure and other potentially difficult and stigmatizing situations	Role playing ways to navigate stressful situations with breast cancer screening and treatment

Supplemental Digital Content 2. GEE Model-Based Counterfactual Estimates of Stigma by Change in Social Support
