| | Item | Recommendations | Page | Relevant text |
| | No | | no. | |
| Title and Abstract | 1 | Study's design | | |
| | | Abstract has informative and | | |
| | | balanced summary of what | | |
| | | was done and what was | | |
| | | found | | |
| Introduction | | | | |
| Background/rationale | 2 | Scientific background & | | |
| | | rationale for investigation | | |
| | | being reported | | |
| Objectives | 3 | Specific objectives, including | | |
| | | pre-specified hypotheses | | |
| Methods | | | | |
| Study Design | 4 | Key elements of study | | |
| | | design presented early in | | |
| | | paper | | |
| Setting | 5 | Describe setting, locations, | | |
| | | relevant dates, including | | |
| | | recruitment, exposure, | | |
| | | follow up and data collection | | |
| Participants | 6 | A1-Cohort study: eligibility | | |
| | | criteria, source and methods | | |
| | | of selection of participants, | | |
| | | methods | | |
| | | a2-Case control study: | | |
| | | eligibility criteria, sources | | |
| | | and methods of case | | |
| | | ascertainment & control | | |
| | | selection ; give rationale for | | |
| | | choice of cases & controls | | |
| | | a3-Cross-sectional study: | | |
| | | eligibility criteria and | | |

| | | 1 | | |
|------------------------|----|--------------------------------|---|---|
| | | sources & methods of | | |
| | | selection of participants | | |
| | | B1– Cohort study: matched | | |
| | | studies – give matching | | |
| | | criteria and number of | | |
| | | exposed & unexposed | | |
| | | B2-Case-control study – | | |
| | | matched studies –give | | |
| | | matching criteria & # of | | |
| | | controls per case | | |
| Variables | 7 | Define all outcomes, | | |
| | | exposures, predictors, | | |
| | | potential confounders, and | | |
| | | effect modifiers. Give | | |
| | | diagnostic criteria | | |
| Data | 8 | For each variable of interest, | | |
| sources/measurement | | give source of data & details | | |
| | | of methods & assessment | | |
| | | (mm). Describes | | |
| | | comparability of assessment | | |
| | | methods if there is > one | | |
| | | group | | |
| Bias | 9 | Describes any efforts to | | |
| | | address potential sources of | | |
| | | bias | | |
| Study size | 10 | Explains how study size was | | |
| | | arrived at | | |
| Quantitative variables | 11 | Explains how quantitative | | |
| | | variables were bundled on | | |
| | | the analyses(describe which | | |
| | | groups were chosen and | | |
| | | why) | | |
| Statistical methods | 12 | a-Describes all statistical | | |
| | | methods, including those | | |
| | | used to control for | | |
| | | confounding | | |
| | 1 | L C | I | I |

| | | L Deservites and the | |
|-------------------|----|--|--|
| | | b-Describes any methods | |
| | | used to examine subgroups | |
| | | & interaction | |
| | | c-explains how missing data | |
| | | were addressed | |
| | | d-Cohort study-explain how | |
| | | loss to follow-up was | |
| | | addressed | |
| | | d2-case-control study- | |
| | | explain how matching of | |
| | | cases & controls was | |
| | | addressed | |
| | | d3-cross-sectional study – | |
| | | describes analytical methods | |
| | | taking account of sampling | |
| | | strategy | |
| | | d4-describes sensitivity | |
| | | analyses | |
| Results | | | |
| Participants | 13 | A-Report numbers of | |
| | | individuals at each usage of | |
| | | study-e.g. numbers | |
| | | potentially eligible, | |
| | | examined for eligibility, | |
| | | confirmed eligible, included | |
| | | in the study, completing | |
| | | follow-up & analyzed | |
| | | B-give reasons for non- | |
| | | participation at each stage | |
| | | C-consider use of a flow | |
| | | diagram | |
| *Descriptive data | 14 | A-give characteristics of | |
| | | study participants(e.g. | |
| | | demographics, clinical, | |
| | | | |
| | | social) & information on | |
| | | social) & information on exposures & potential | |
| | | | |

| | | B-indicate number of participants with missing data for each variable of interest C-Cohort study – summarize follow up time (e.g. average | |
|----------------|----|--|--|
| | | and total amount) | |
| Outcome data | 15 | Cohort study-report | |
| | | numbers of outcome events | |
| | | or summary measures over | |
| | | time | |
| | | Case control study – report | |
| | | numbers in each exposure | |
| | | category, or summary | |
| | | measures of exposure | |
| | | Cross sectional study – | |
| | | reports numbers of outcome | |
| | | events or summary | |
| | | measures | |
| Main results | 16 | A-gives unadjusted | |
| | | estimates & confounder- | |
| | | adjusted estimates and their | |
| | | precision (e.g. 95% | |
| | | confidence interval). Make | |
| | | clear which confounders | |
| | | were adjusted for & why | |
| | | they were included | |
| | | B-reports category | |
| | | boundaries when continuous | |
| | | variables were categorized | |
| | | C-consider translating | |
| | | estimates of relative risk into | |
| | | absolute risk for a | |
| | | meaningful time period | |
| Other analyses | 17 | Reports other analyses done | |
| | | – analyses of subgroups & | |
| | | interactions & sensitivity | |
| | | analyses | |

| Discussion | | | |
|-------------------|----|--------------------------------|--|
| Key results | 18 | Summarize key results with | |
| | | reference to study objectives | |
| Limitations | 19 | Discusses limitations of | |
| | | study, taking into account | |
| | | sources of potential bias or | |
| | | imprecision. Discusses both | |
| | | direction & magnitude of | |
| | | any potential bias | |
| Interpretation | 20 | Gives a cautious overall | |
| | | interpretation of results | |
| | | considering objectives, | |
| | | limitations, multiplicity of | |
| | | analyses, results from similar | |
| | | studies & other relevant | |
| | | evidence | |
| Generalizability | 21 | Discusses generalizability or | |
| | | external validity of study | |
| | | results | |
| Other information | | | |
| Funding | 22 | Gives the source of funding | |
| | | and the role of funders for | |
| | | the present study & for the | |
| | | original study on which the | |
| | | present article is based. | |
