

Supplementary Figure 1. Levels of serum K18-M30 (a,d), K18-M65 (b,e) and K18-M30:M65 ratio (c,f) in patients defined by the presence or absence of Mallory-Denk bodies (a-c) or megamitochondria (d-f) on liver biopsy. Data are displayed as the median (solid bar), interquartile range (box) and 95% confidence intervals (whiskers).
