

**Supplemental Figure 1. GIQuIC Registry Record Inclusion Criteria Flowchart**

The “new format” records use GIQuIC’s latest specifications. Most sites converted to these around April 2020. NDBE: records with pathology confirmed non dysplastic Barrett’s esophagus. Seattle: records with a documented potential Barrett’s length. DDR: records with a documented finding consistent with Barrett’s esophagus. Dysplasia detection rate includes indefinite for dysplasia, low grade dysplasia, and high-grade dysplasia
