

A rough estimate of your family member's prognosis

Note: This prognosis is based on your family member's admission information for:

Age, level of wakefulness, size and location of the bleeding stroke.

This prognosis does not include *health before the bleeding stroke, injuries to other organs and clinical course and complications in the ICU.* Ask the doctor in the meeting how these may change your family member's prognosis.

At 12 months post bleeding stroke

- This forecast **does not take every patient factor into account.**
- There remains a large amount of **uncertainty** in many patients of this type.
- Your family member's doctor will be able to tell you more about the level of uncertainty in a prognosis for your family member.
