SUPPLEMENTAL DIGITAL CONTENT 3. Description of the Databases

The IBM *MarketScan* Commercial Claims and Encounters Database contains data for several million employees and their dependents, covered under a variety of fee-for-service and capitated health plans, including patients from all US census regions. It also contains Early View data, which is released monthly and captures healthcare services incurred as late as ~45 days before data release.

The IBM *MarketScan* Multi-State Medicaid Database reflects the healthcare service use of Medicaid enrollees in 10–13 geographically dispersed states. It contains the pooled healthcare experience of Medicaid enrollees, covered under fee-for-service and managed care plans.
