

## **SUPPLEMENTARY MATERIAL**

### **TABLE OF CONTENTS**

Supplementary Table 1 – list of search terms used to identify clinical outcomes

Supplementary Table 2 - Number of respondents for each symptom

Supplementary Table 1 – list of search terms used to identify clinical outcomes

Dialysis
Transplant
Hospice
Palliative
Goals of care
Conservative care
Advance care planning
Advance directive
Living will
Power of attorney
Surrogate
Decision maker

Supplementary Table 2 - Number of respondents for each symptom

Anorexia	156
Anxiety	156
Depression	156
Fatigue	156
Insomnia	156
Nausea	156
Pain	156
Constipation	155
Drowsiness	155
Dyspnea	120
Diarrhea	63
Sore or dry mouth	63
Itching	62
Poor mobility	62
Restless legs	62
Skin changes	62
Vomiting	62

Prior to transitioning to iPOS-Renal, the clinic administered the ESAS, so the number of respondents for symptoms included in both instruments is higher (120-156) than for symptoms included only in the iPOS-R only (62-63).
