

APPENDIX

Supplementary Digital Content, Figure 1. Flow diagram for the analytic data set.

Supplementary Digital Content, Figure 2. Incidence of COVID-19 Deaths per 100,000 residents vs. county percentage of non-Hispanic Black residents.

Supplementary Digital Content, Figure 3. Incidence of COVID-19 Deaths per 100,000 residents vs. county percentage of Hispanic residents.

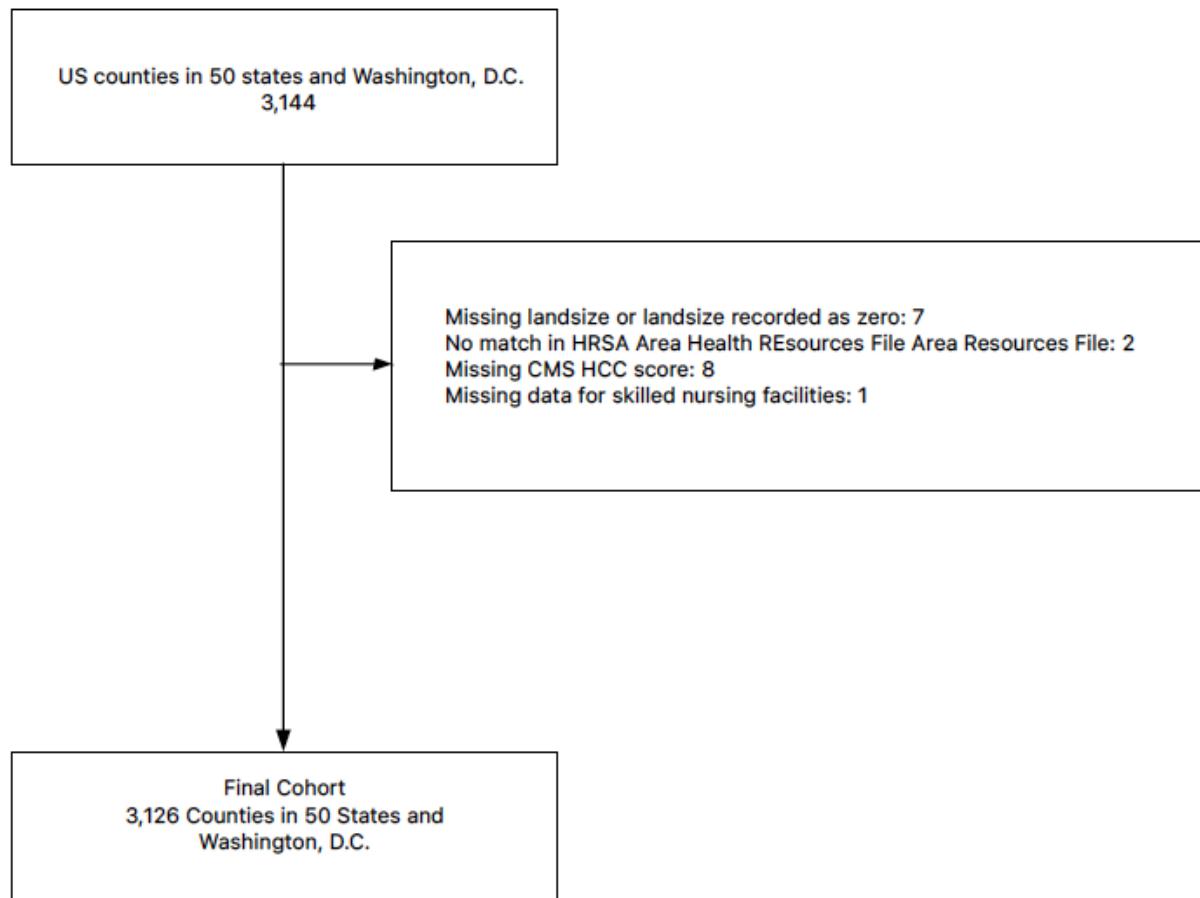

Supplementary Digital Content, Figure 4. Calibration plots the fully adjusted model.

Supplementary Digital Content, Table 1. List of key variables and data sources.

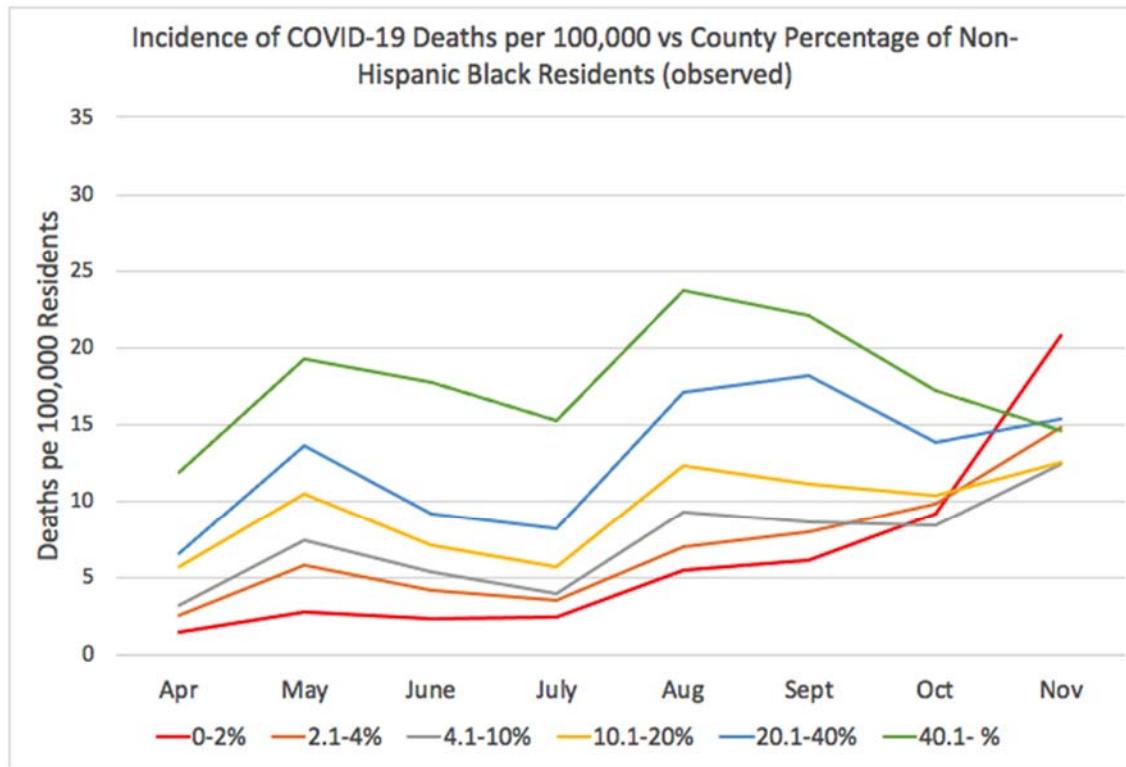

Supplementary Digital Content, Table 2. Characteristics of US counties by proportion of non-Hispanic Black and Hispanic residents.

Supplementary Digital Content, Table 3. Risk of COVID-19 Death as a function of county percentage of non-Hispanic Black and Hispanic residents.

Supplementary Digital Content, Figure 1. Flow diagram for the analytic data set.

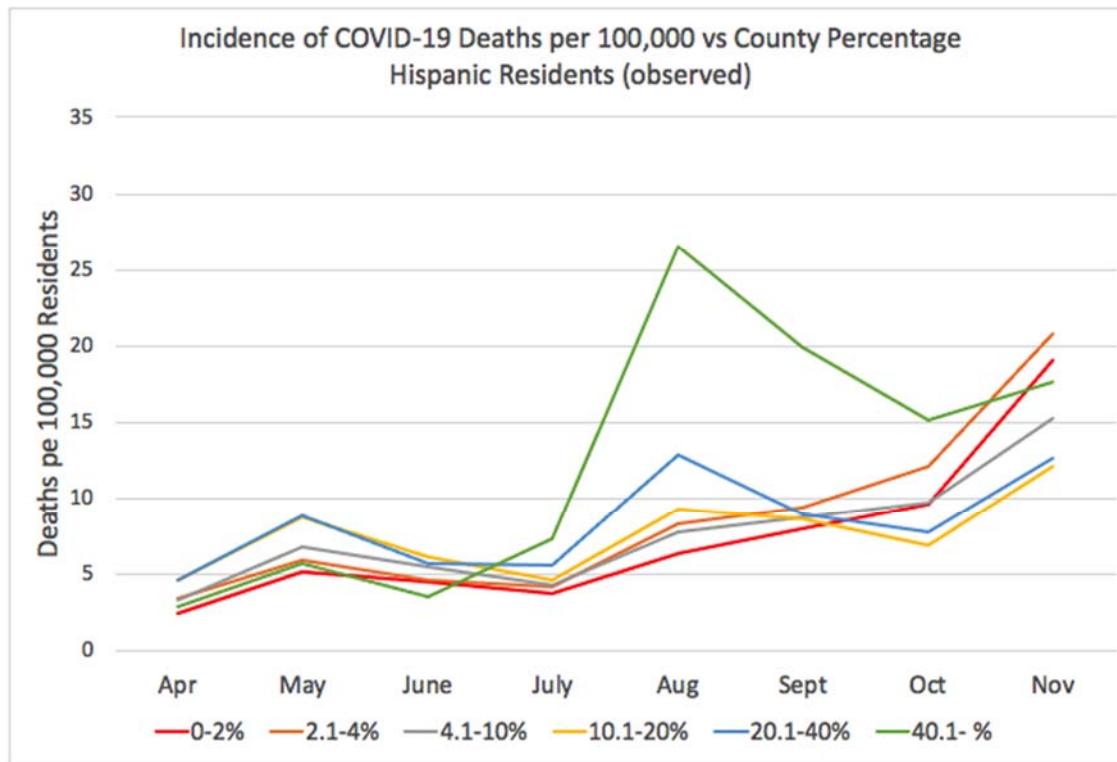

Supplementary Digital Content, Figure 2. Incidence of COVID-19 Deaths per 100,000 residents vs. county percentage of non-Hispanic Black residents.

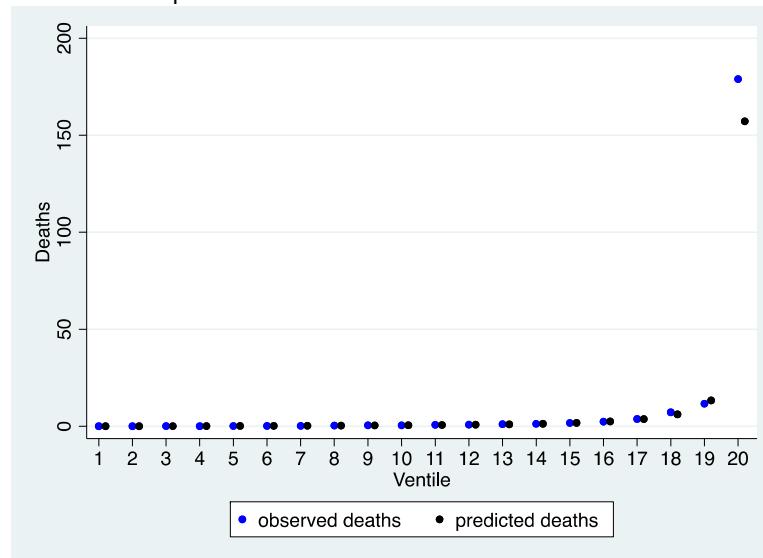

Based on the mean of the county number of incident deaths per 100,000 residents for each time period.

Supplementary Digital Content, Figure 3. Incidence of COVID-19 Deaths per 100,000 residents vs. county percentage of Hispanic residents.

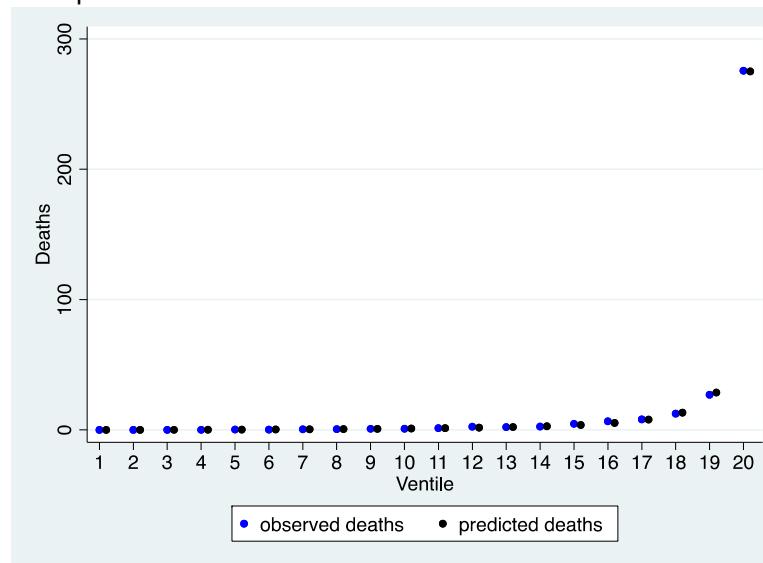

Based on the mean of the county number of incident deaths per 100,000 residents for each time period.

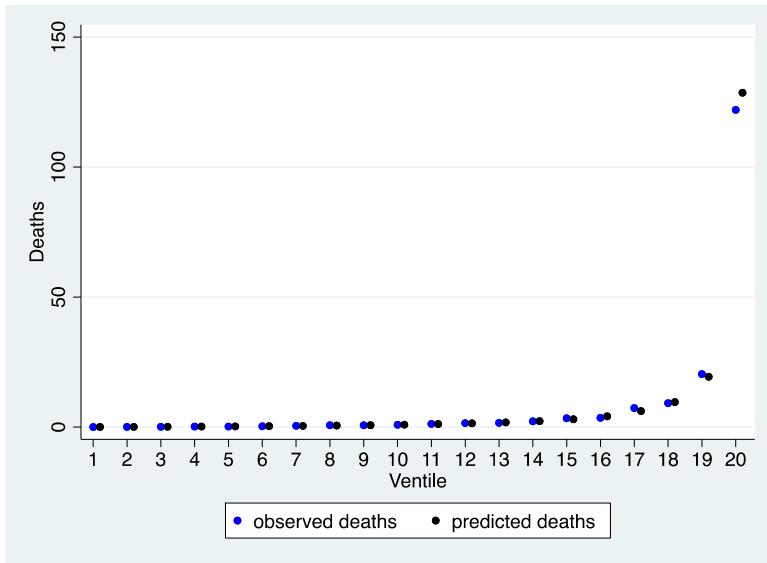

Supplementary Digital Content, Figure 4. Calibration Plots for each time interval. Each figure represents the number of observed and predicted death counts in 20-equal sized ventiles.

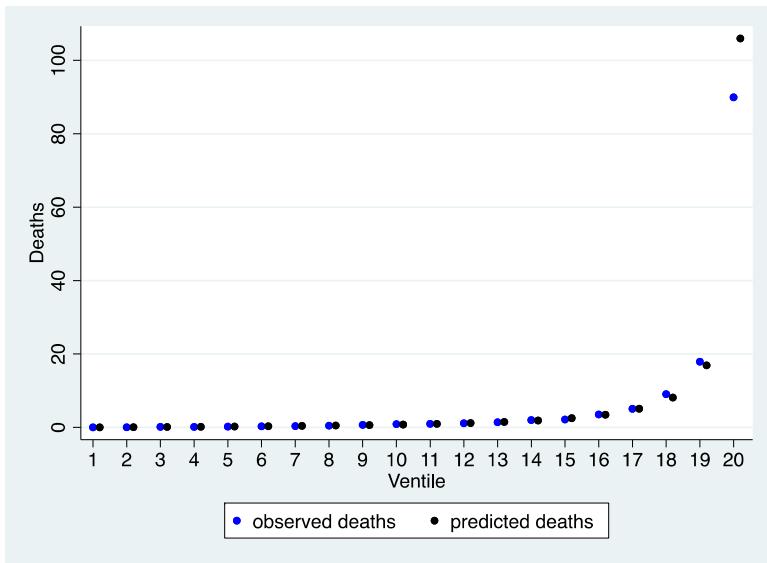

a. April

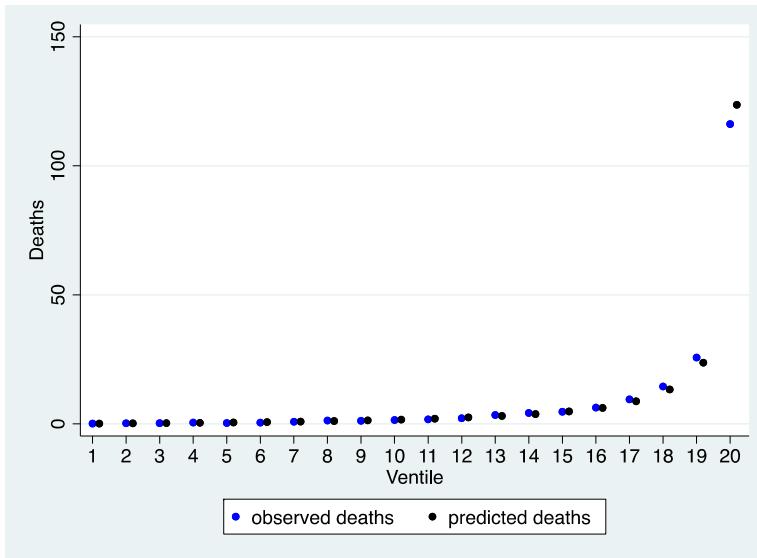

b. May

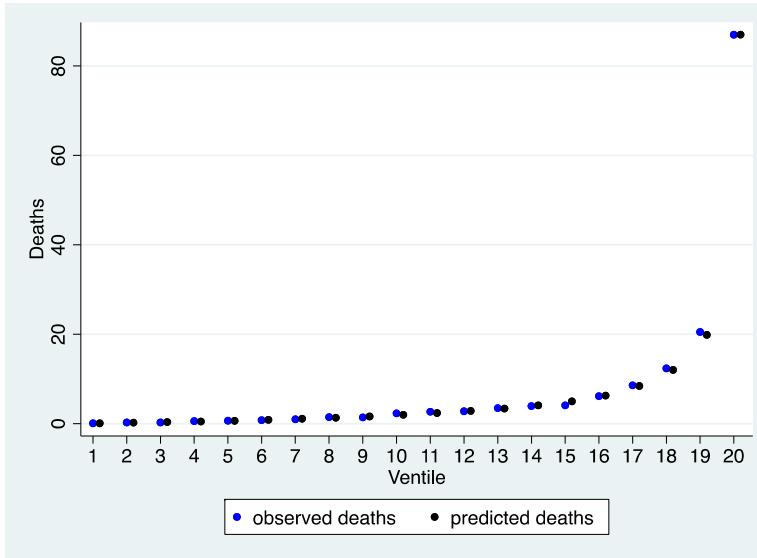

c. June

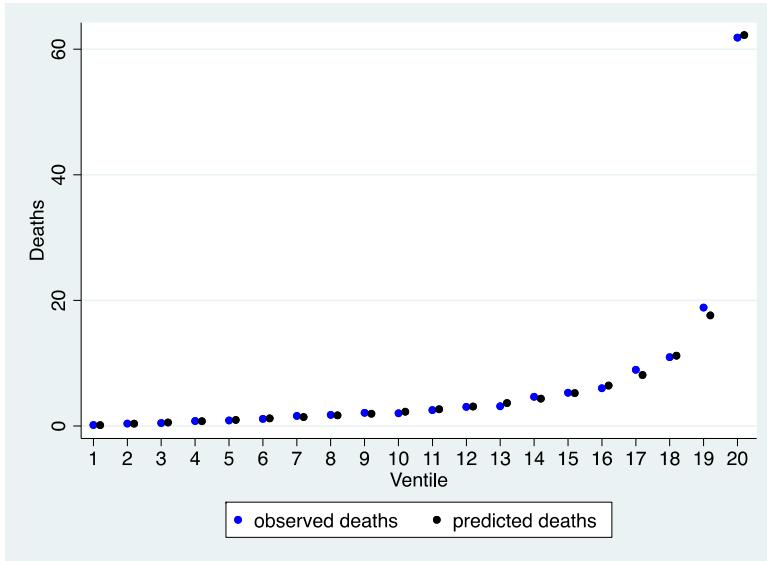

d. July

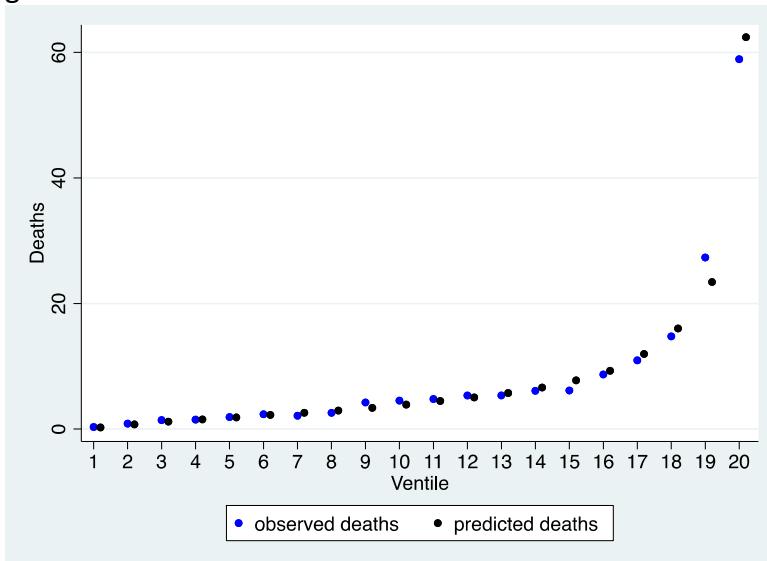

e. August

f. September

g. October

h. November
