

# Supplemental Digital Content 6. Mean expenditures per patient attributed to lung cancer during active treatment phase, by expenditure item, between 2015 and 2019

mean expenditure,  
€/patient

Midwives care and hospitalisations in psychiatry were not reported in the legend because the corresponding expenditures were null. The item “drugs and medical devices out of DRG” corresponds to expensive drugs and medical devices not counted in the basic cost of the stay, e.g., chemotherapy.

\* This category of expenditures was not detailed here for better readability. \*\* Including other paramedical care, dental care, physiotherapists and laboratory tests, grouped with this item due to very low expenditures per patient.

Abbreviation: DRG, diagnosis-related group (determining the cost of the stay according to diagnosis and medical procedures)
