
SUPPLEMENTAL DIGITAL CONTENT Figure 3. Representative FACS plots for MAIT cell chemokine receptor expression for CCR4$^+$ at **A)** baseline, **B)** 0 h and **C)** 1 h post-exercise, CCR5$^+$ at **D)** baseline, **E)** 0 h and **F)** 1 h post-exercise, CCR6$^+$ at **G)** baseline, **H)** 0 h and **I)** 1 h post-exercise, and MAIT cells expressing the early activation maker CD69 at **J)** baseline, **K)** 0 h and **L)** 1 h post-exercise. The representative plots were selected from the participant with percent of the respective chemokine expression that was closest to mean baseline value while the 0 h and 1 h plots are from the same participant.
