

**SUPPLEMENTAL DIGITAL CONTENT Figure 4.** Representative FACS plots for stimulated MAIT cells expressing intracellular TNFα at **A)** baseline, **B)** 0 h and **C)** 1 h post-exercise, IFN? **D)** baseline, **E)** 0 h and **F)** 1 h post-exercise, and IL-17 at **G)** baseline, **H)** 0 h and **I)** 1 h post-exercise. The representative plots were selected from the participant with percent of the respective chemokine expression that was closest to mean baseline value while the 0 h and 1 h plots are from the same participant.
